

Ana Menü

Oyuna başladıktan sonra ana menü ile karşılaşacaksınız. Ana menüden tüm farklı senaryolara, seçeneklere, rehbera erişebilir ve oyundan çıkabilirsiniz.

Seçenekler menüsünde, kumanda türünüzü Joystick veya Gamepad olarak değiştirebilirsiniz. Bu oyunu oynamanın tavsiye edilen yolu Joystick'tir, ancak Joystick'i kullanarak oyun boyunca gezinmekte zorluk çekiyorsanız, bunun yerine Gamepad'i seçebilirsiniz.

Joystick kontrolleri bu şekilde görünür:

- 1) Dairesel kumanda kolunu kullanarak oyuncu her yöne hareket edebilir
- 2) Oyuncu ikinci joystick'i kullanarak kamerasını (görüş alanını) sola ve sağa hareket ettirebilir

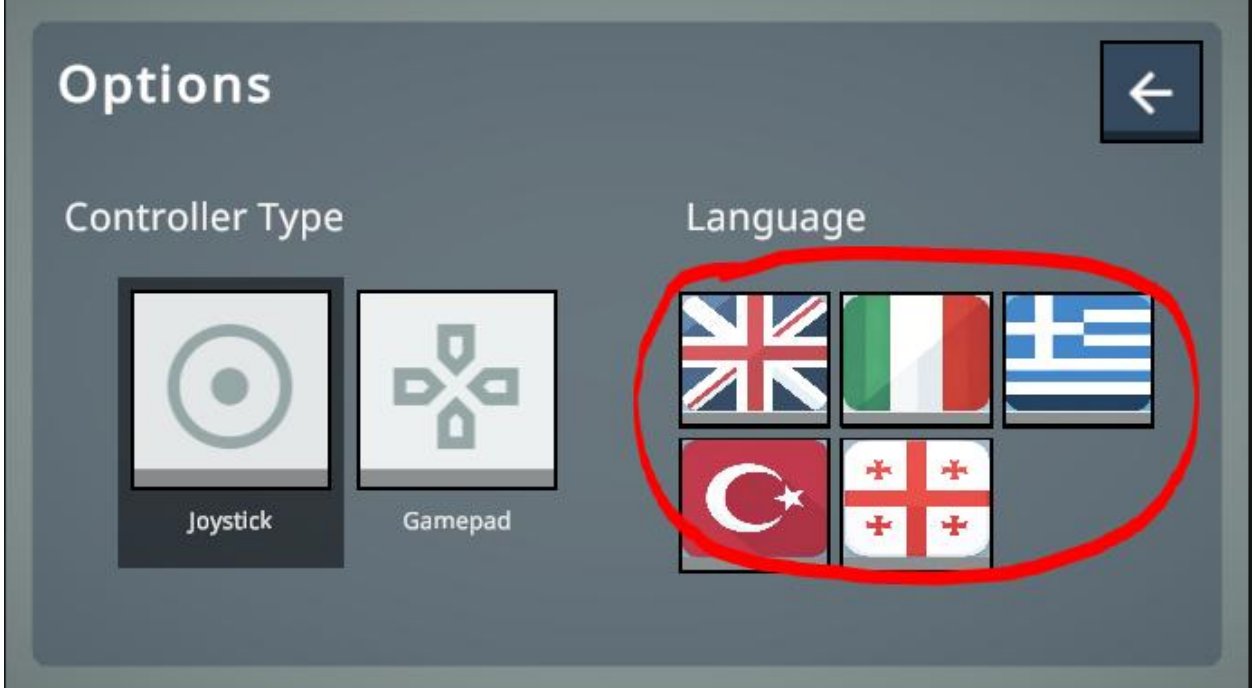

Bu, telefonu dikey olarak tutarken ve her iki baş parmağınız da kumanda kollarının üzerindeyken sorunsuz ve tutarlı hareket sağlar.

Gamepad kontrolleri erişilebilirlik için basitleştirilmiştir ve şu şekilde görünür:

Sol taraftaki düğmeleri kullanarak oyuncu ileri ve geri hareket edebilir. Sağdaki düğmeleri kullanarak oyuncu sola ve sağa dönebilir.

Seçenekler menüsünde tüm oyunun dilini değiştirmek de mümkündür:

OYNA'ya tıklamak sizi Senaryo Seçimi ekranına götürecektir. Burada hangi senaryoyu oynamak istediğinizi seçebilirsiniz: Yangın, Heyalan veya Taşkın. Her senaryo, sırayla tamamlanması gereken 3 seviyeden oluşur.

Başlangıçta, her senaryoda yalnızca ilk seviye mevcut olacaktır.

Bir sonraki seviyeye geçmek için seviyeyi tamamen tamamlamanız gerekecektir. Her seviyenin açıklamasını, en yüksek skorunuzu, zamanlamasını ve gereksinimlerini burada bulabilirsiniz:

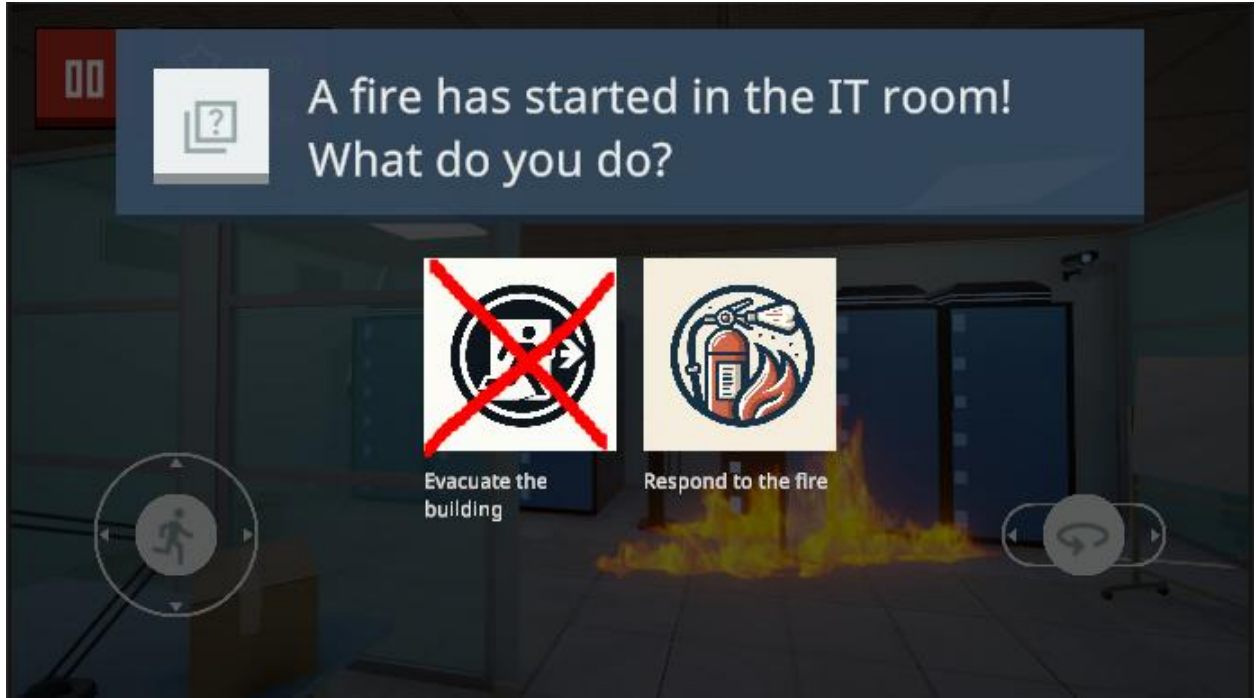

OYNAT'a tıkladıktan sonra seviyeye başlayabilirsiniz.

Aşağıda, tüm soruların cevaplarıyla birlikte oyunun tamamını nasıl tamamlayacağınıza dair ayrıntılı bir kılavuz bulacaksınız.

Yangın Senaryosu: Seviye 1

Ofisinizin bilgi işlem odasında başlıyorsunuz. Bir yangının başladığını fark ediyorsunuz ve görünüşe göre kendi başınıza söndüremeyeceğiniz kadar büyük. Bir sonraki seviyeye geçmek için binayı 1 dakika içinde tahliye etmeniz ve tüm soruları doğru yanıtlamanız gerekiyor.

Doğru cevaplar çarpı işareti ile gösterilecektir.

Sağa dönün ve kapıdan geçin

Dumanın yayılmasını yavaşlatmak için kapıyı kapatın.

Koridordan sađa dönün

Acil durum işarelerini takip edin

You find yourself in the hallway. How do you proceed with your evacuation?

Run away!

Walk slowly.

Walk with controlled fast steps

You have entered the hallway. What do you do?

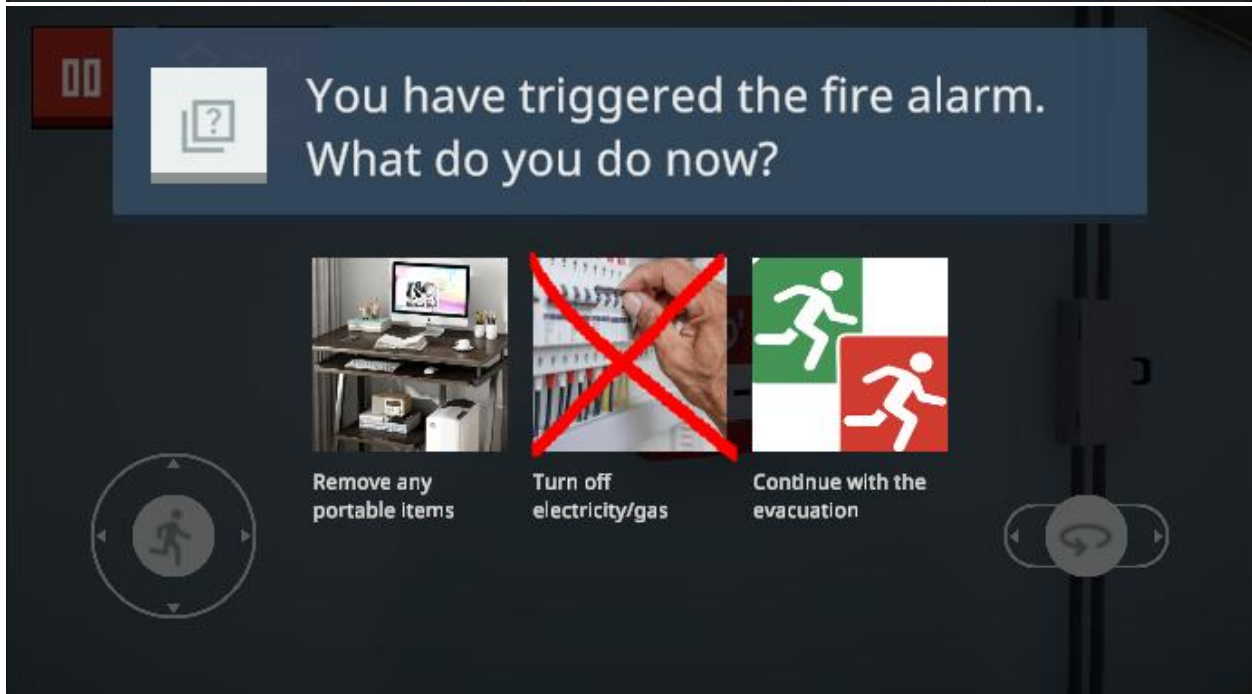

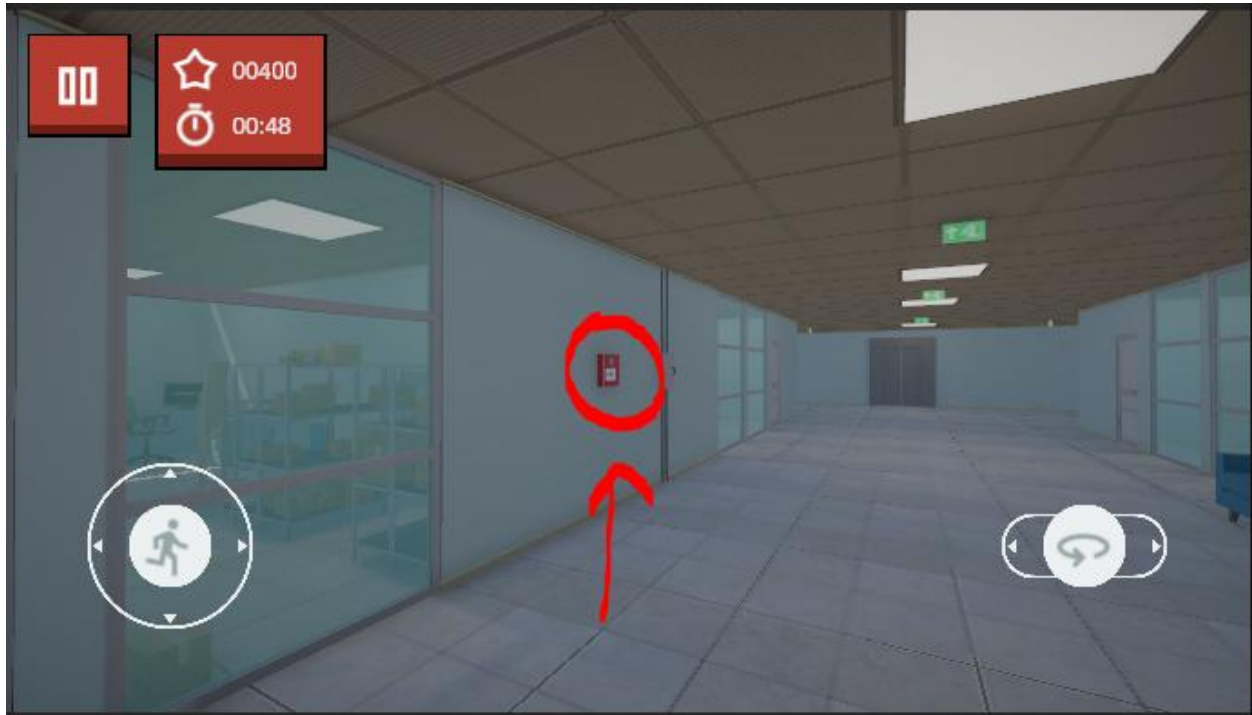

Continue with the evacuation

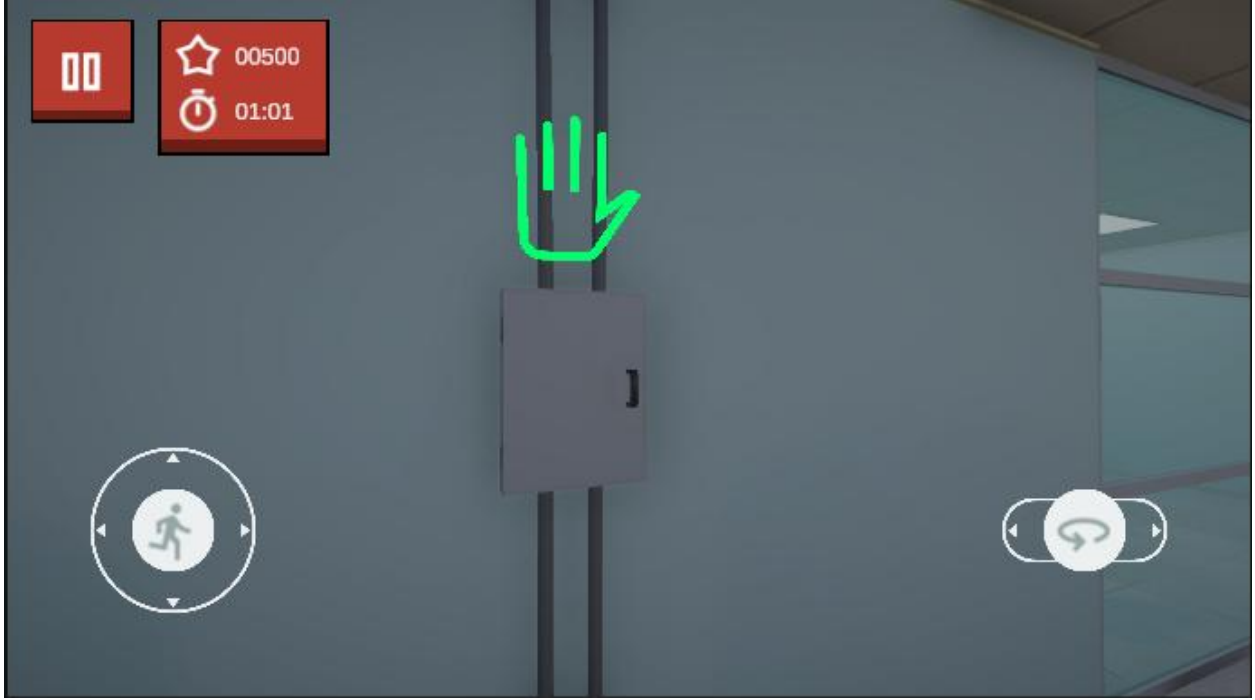

Trigger the fire alarm

Yangın alarmına yaklaşın ve tetiklemek için üzerine tıklayın

Elektrik, yangın alarmının hemen yanındadır. Devam etmek için üzerine tıklayın

Duman odayı doldurmaya başlayacaktır

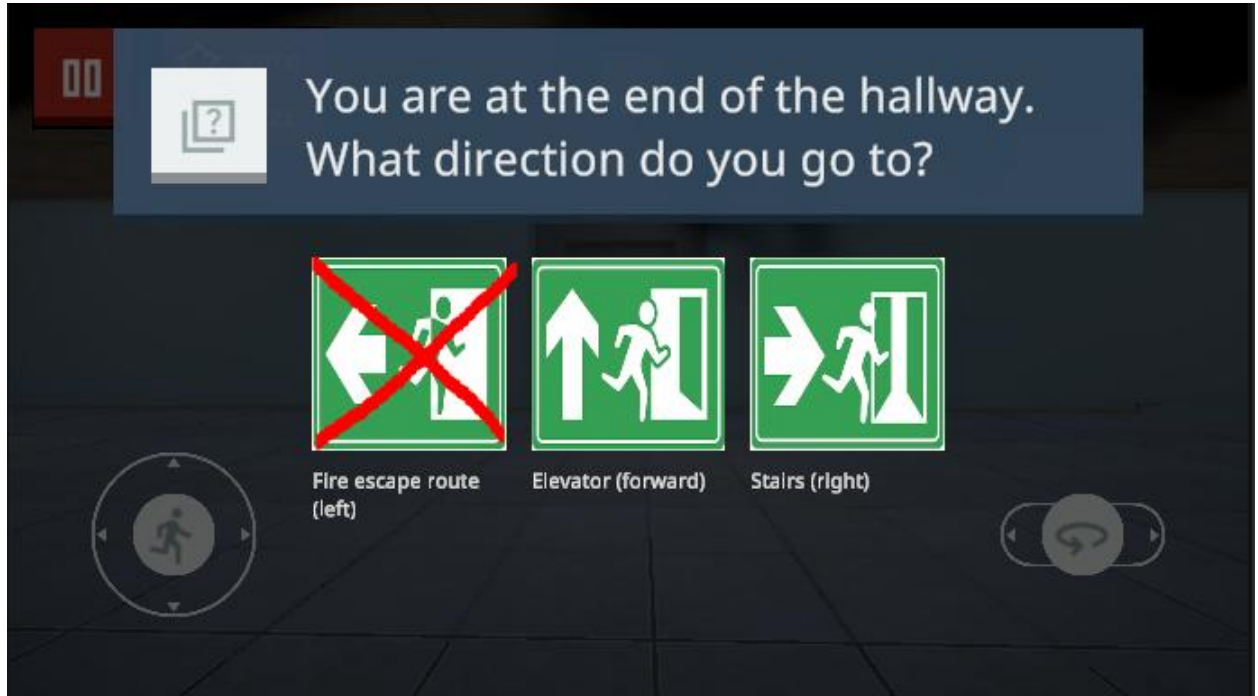

Çömelirseniz görüşünüz daha iyi olacaktır

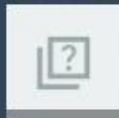

Koridorun sonunda acil yangın merdiveni çıkışı kullanmanız gerekmektedir

Çıkışa ulaştığınızda aşağıdaki soruları yanıtlayın

You have reached the assembly area.
What do you do?

Watch the fire

Write your name to
the officer

Chat with your
friends about the
fire

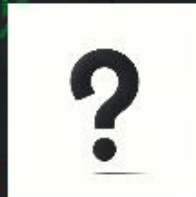

How do you notify the correct
authorities about the fire?

Call 116

Call 112

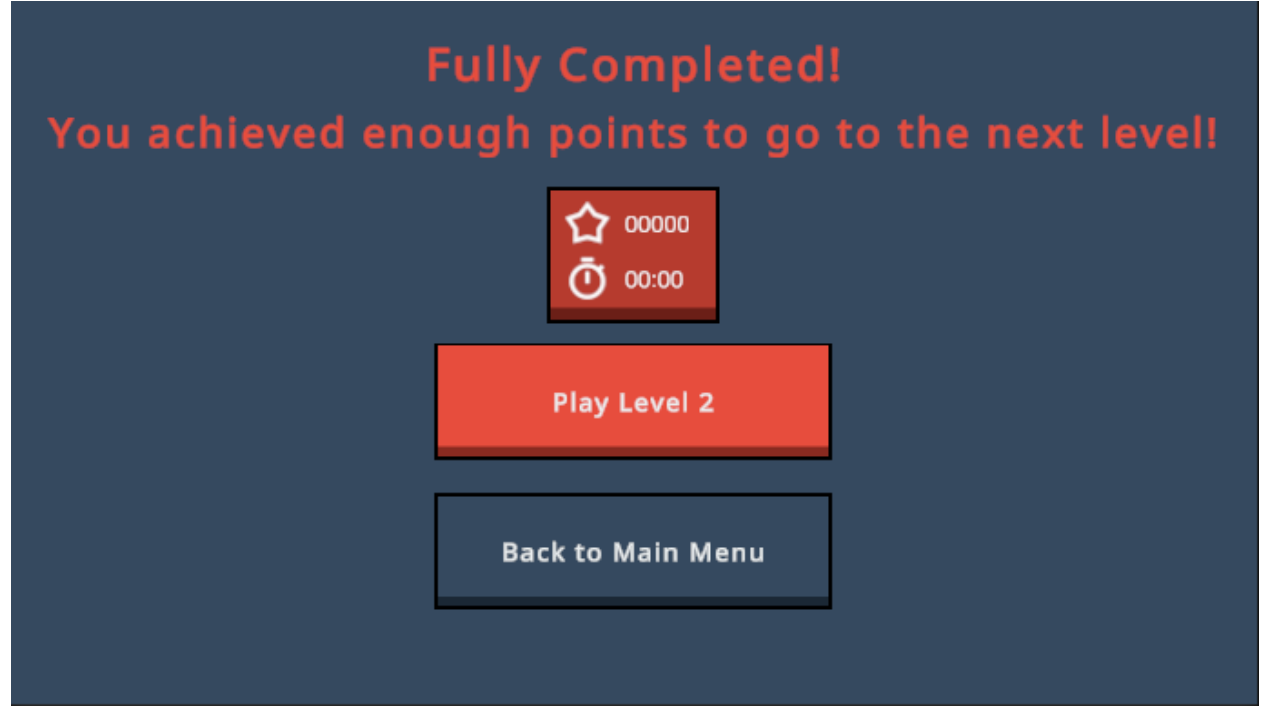

Call 999

Call 666

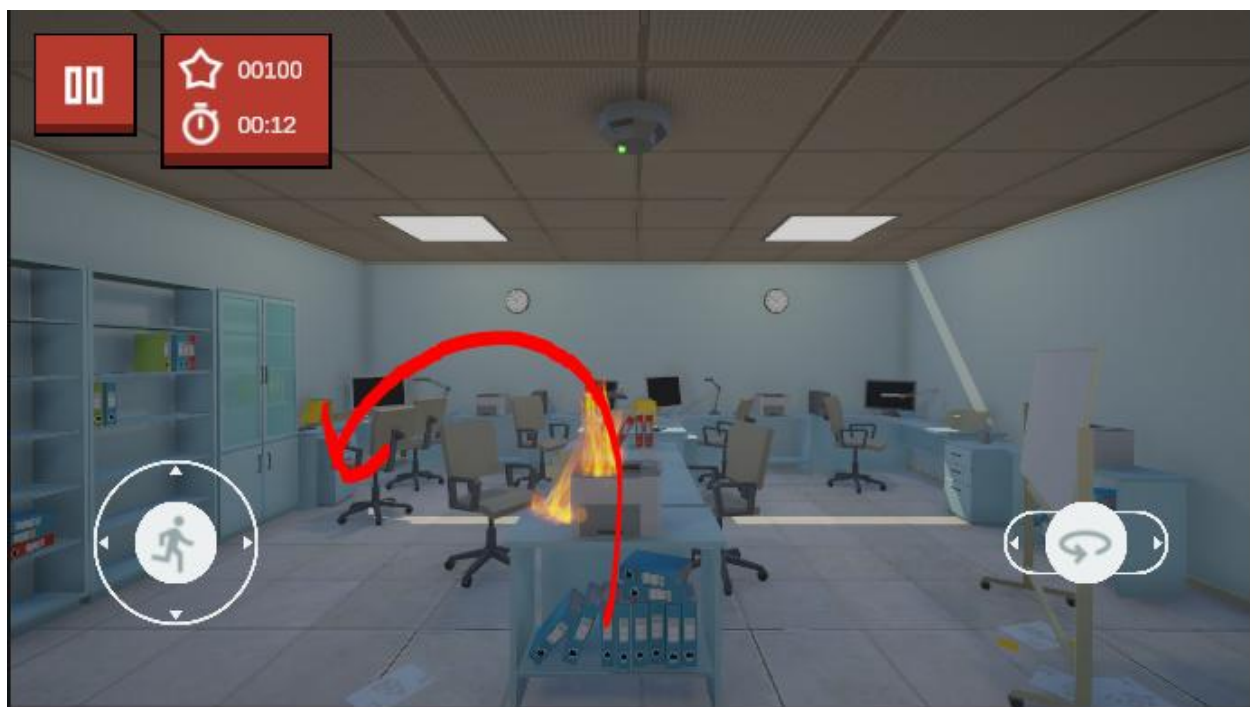

Her şeyi doğru ve 1 dakika içinde cevaplarsanız, bir sonraki seviyeye geçebileceksiniz

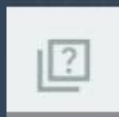

Yangın Senaryosu: Seviye 2

Bu senaryoda, kendi başınıza söndürebileceğiniz küçük bir elektrik yangını başlar.

You have left the IT room. What do you do?

Close the door

Leave the door open

You are in the hallway. What do you do?

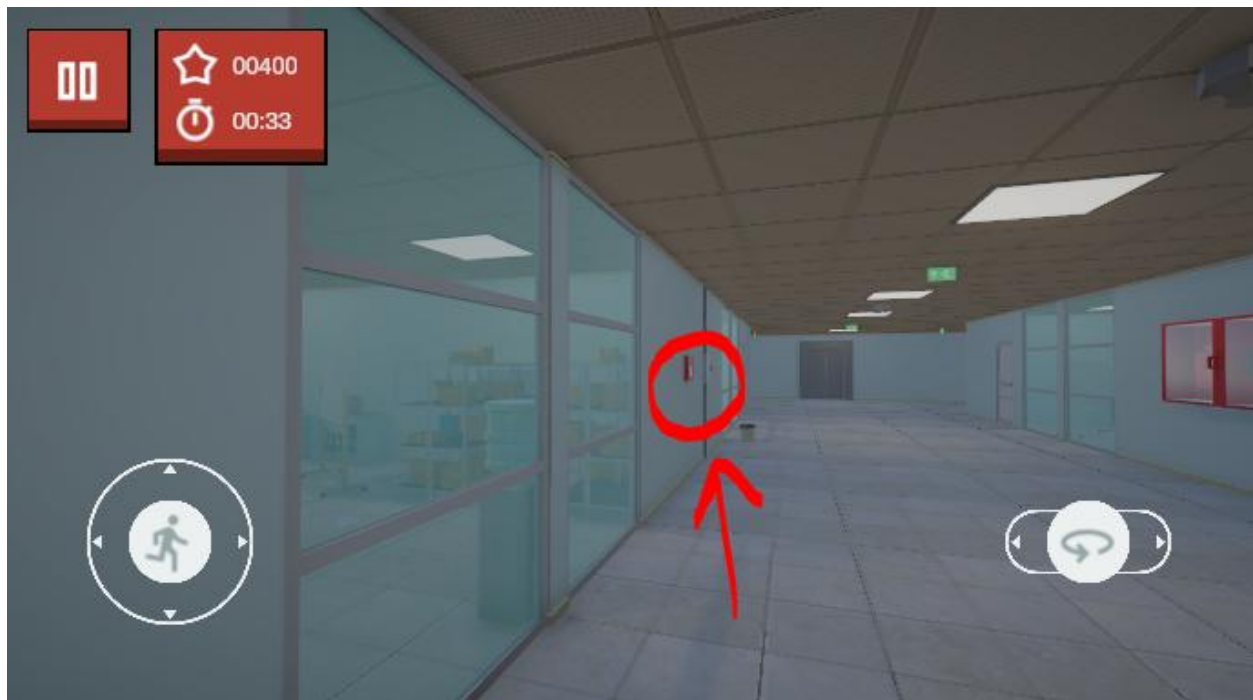

Announce the fire!

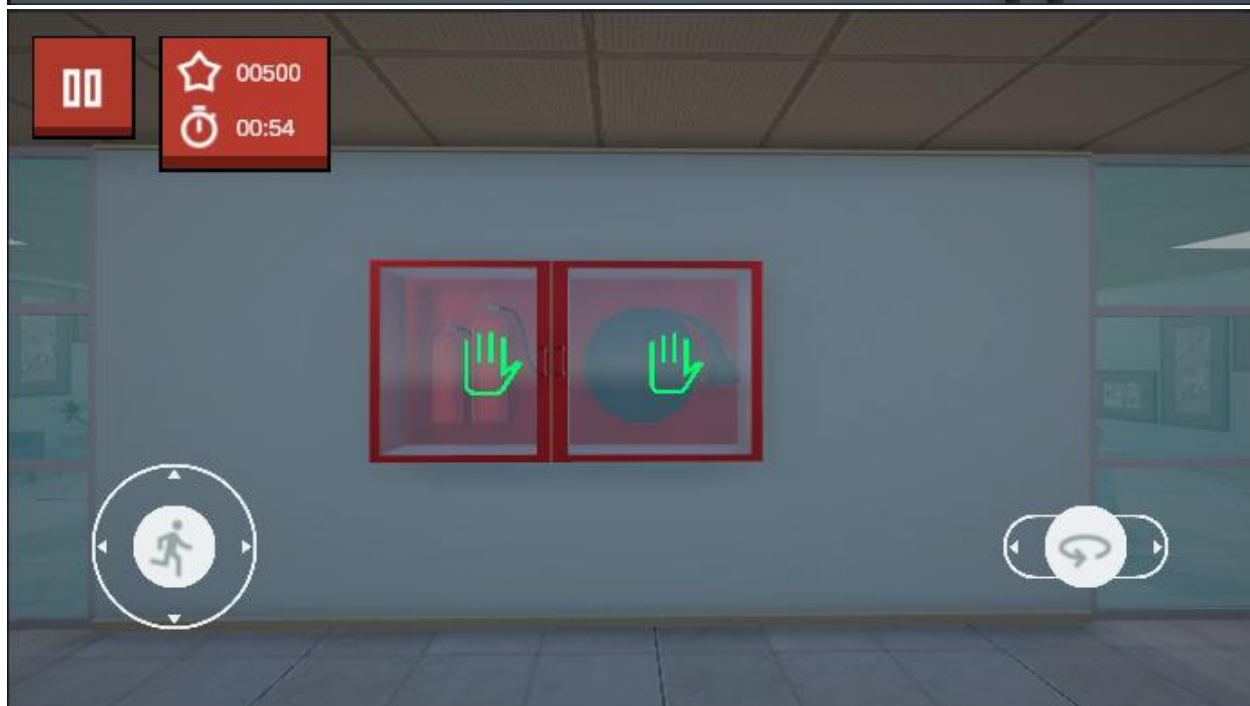

Run away!

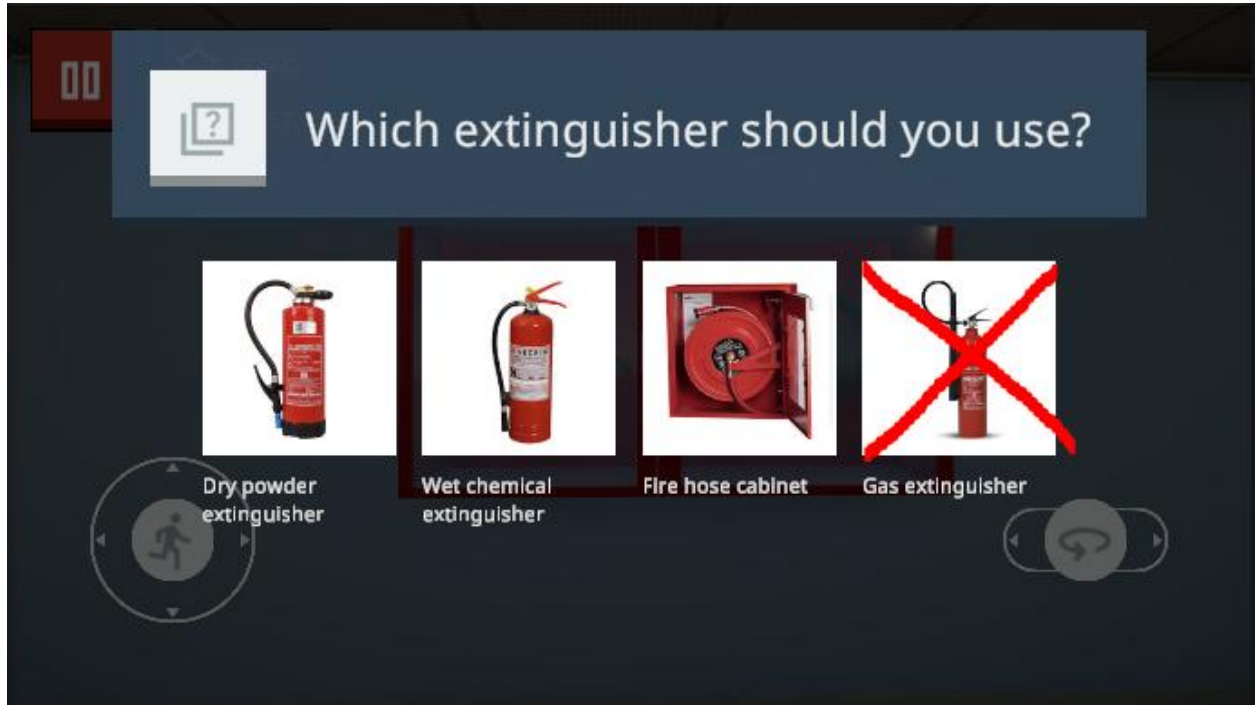

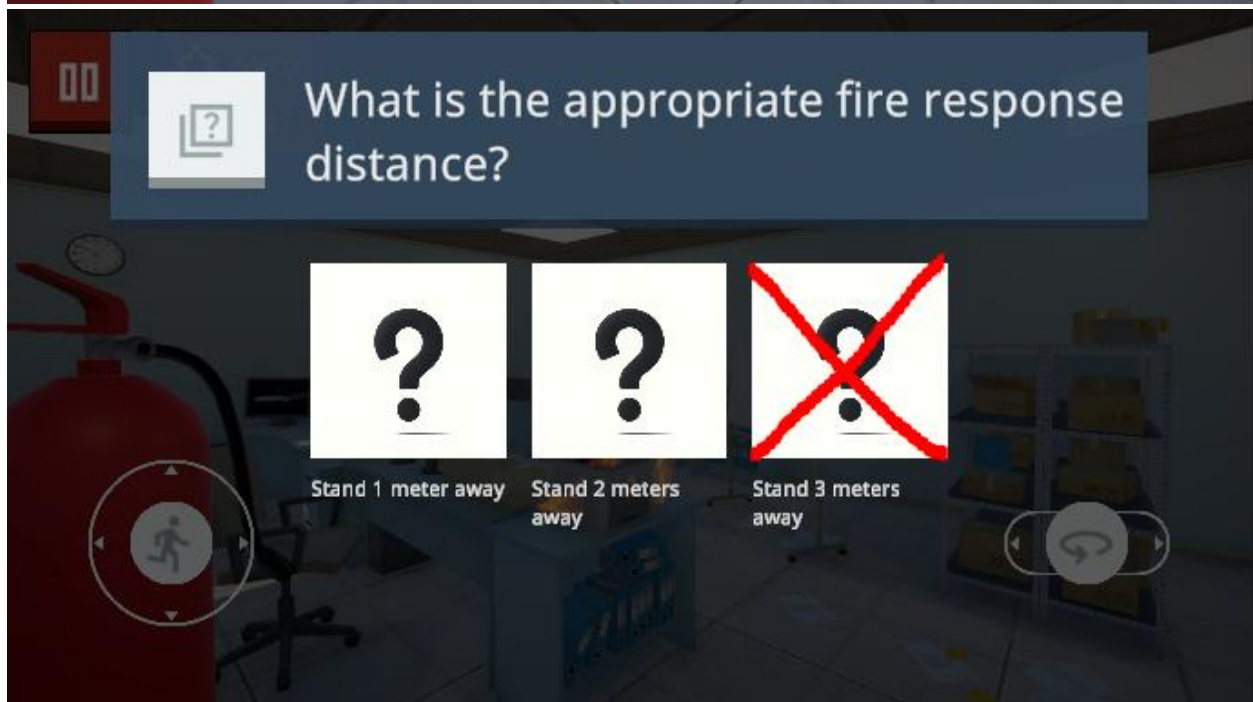

Kuru toz söndürücüyü de alabilirsiniz, ancak size tam puan vermeyecektir

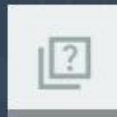

How should you extinguish the fire?

Extinguish the fire while leaning down

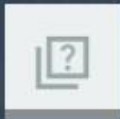

Extinguish the fire while standing

What is the correct order of actions to operate the extinguisher?

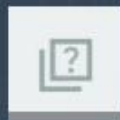

Should you close or open the windows when leaving the environment?

Keep windows open

Keep the windows closed

You have extinguished the fire. What do you do now?

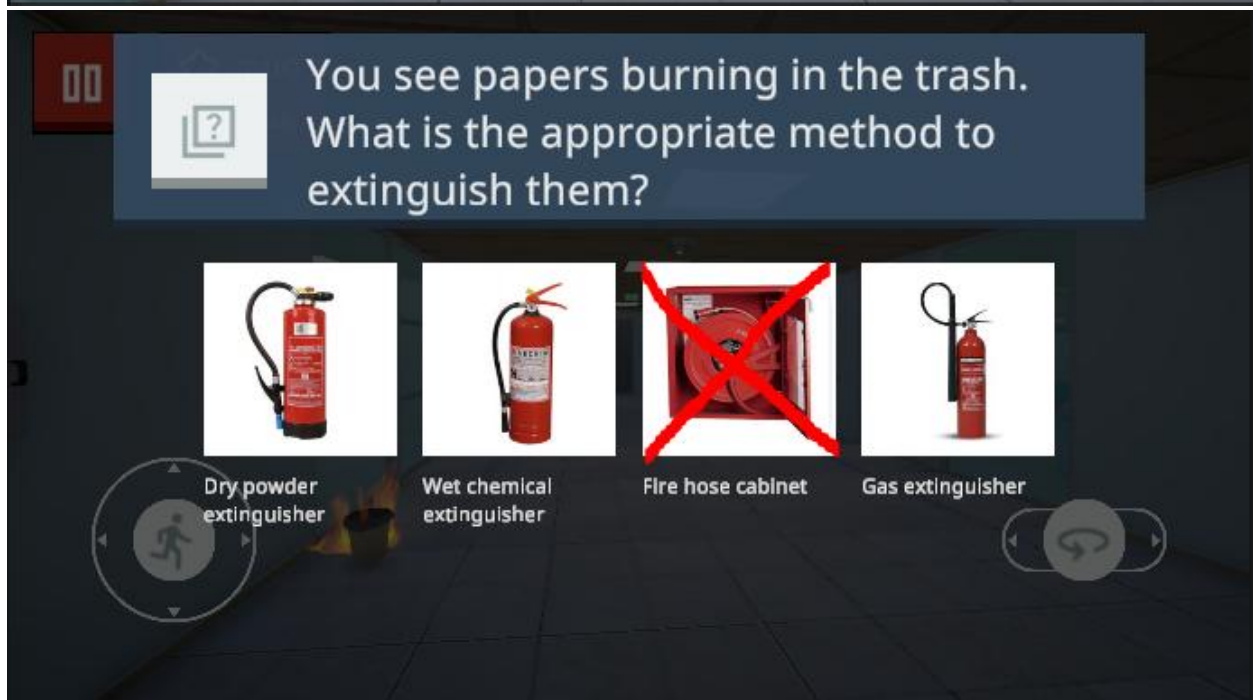

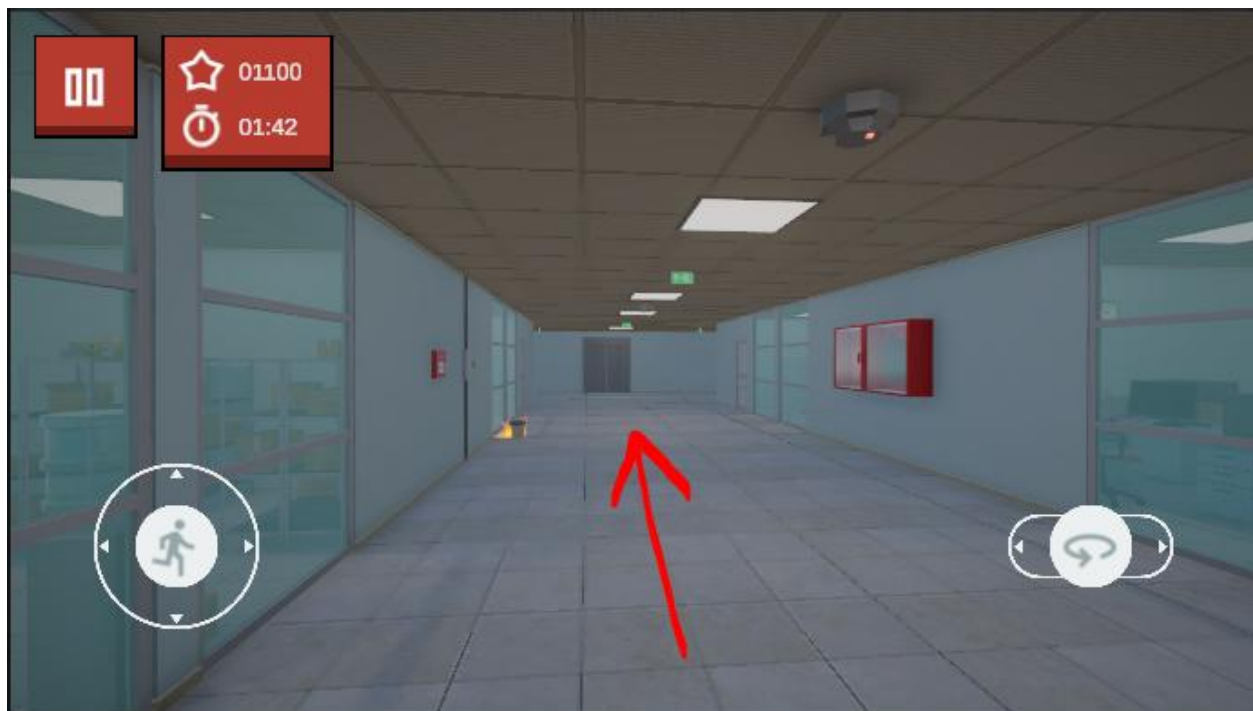

Go back to work

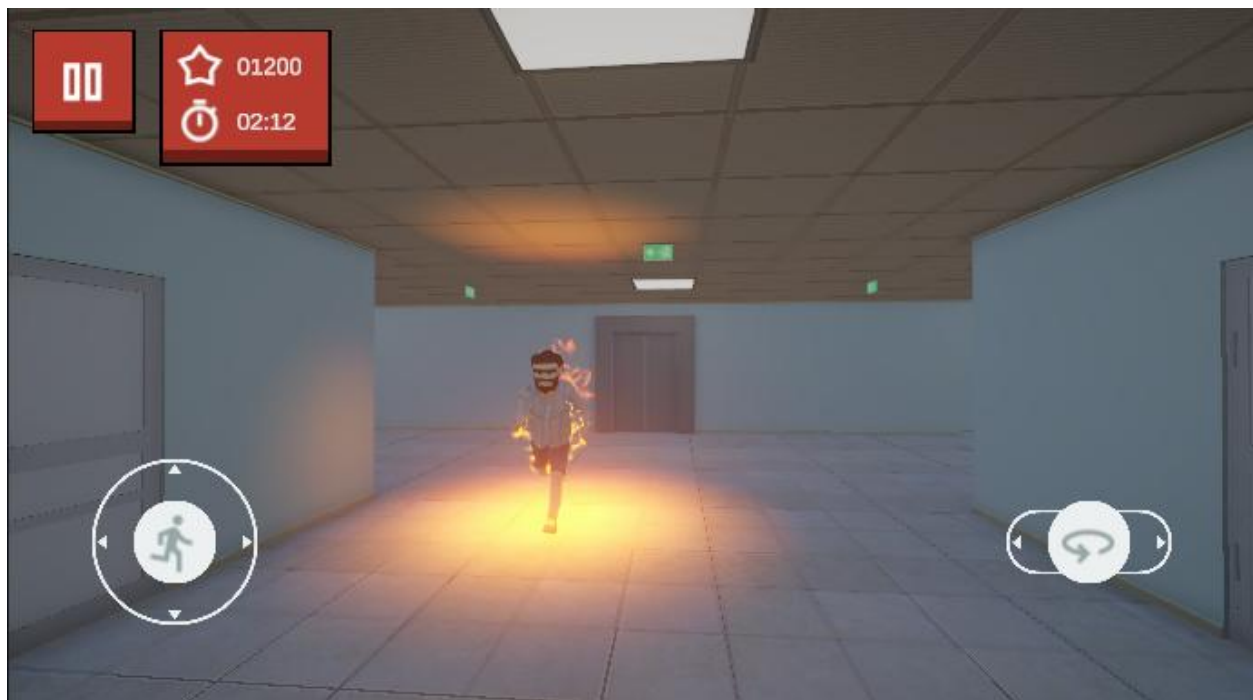

Evacuate

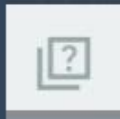

You see a person whose clothes are on fire run towards you! What do you do?

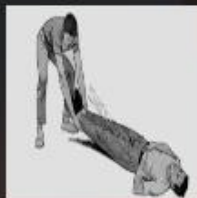

Cover him with polyester clothing

Lie him down and cover with fire blanket

The casualty weighs 35 kg. What is the most appropriate way to carry him?

By holding the legs

By holding the shoulders

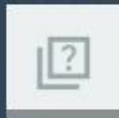

Drag method

Firefighter method

You have reached the assembly area.
What do you do?

Watch the fire

Write your name to
the officer

Chat with your
friends about the
fire

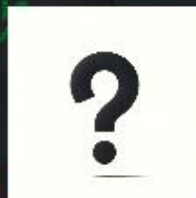

How do you notify the correct
authorities about the fire?

Yangın Senaryosu: Seviye 3

Üçüncü seviyede, 5 dakika içinde 4 kişiyi kurtarmak ve 2 yangını söndürmekle görevlisiniz. Oksijenli maske takmanız ve süre dolana kadar kilometre sayacını takip etmeniz gerekmektedir.

- 1) İlk düğmeye (1) bastığınızda ne kadar oksijeniniz kaldığını gösteren kilometre sayacı açılacaktır. Tam puan almak için seviye boyunca bunu en az 4 kez yapmalısınız
- 2) İkinci düğmeye (2) basıldığında, karanlık alanlarda görünürlüğünüzü artıracak olan el feneri açılır
- 3) Ekranın sağ üst köşesindeki sıcaklık değeri size çevrenizin sıcaklığını bildirecektir. Sıcaklık 500D ve üzerine çıkarsa tavana su püskürtmeniz gerekecektir.

Aşağıda birinci katın yerleşim planı yer almaktadır:

1. Oyuncunun oyuna başladığı binanın girişi
2. İlk kazazedenin yeri
3. İkinci yaralının yeri
4. Sprey kalıbı ile söndürülmesi gereken yangın
5. Sıcaklığın 600D olduğu ve tavana sis püskürtmeniz gereken yer
6. Ofisin ikinci katına çıkan merdivenler

İkinci katın yerleşimi

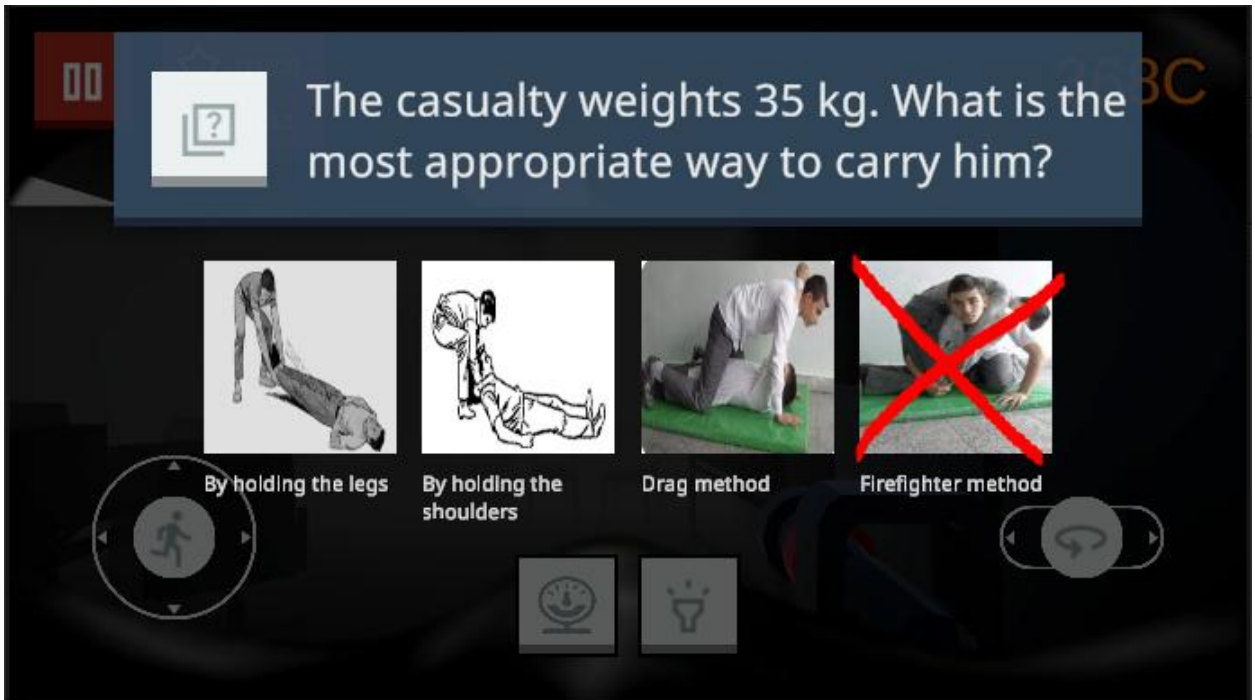

6. İkinci/birinci kata çıkan merdivenler
7. 500D sıcaklık, tavana su püskürtün
8. 500D sıcaklık, tavana su püskürtün
9. Üçüncü kazazedenin yeri

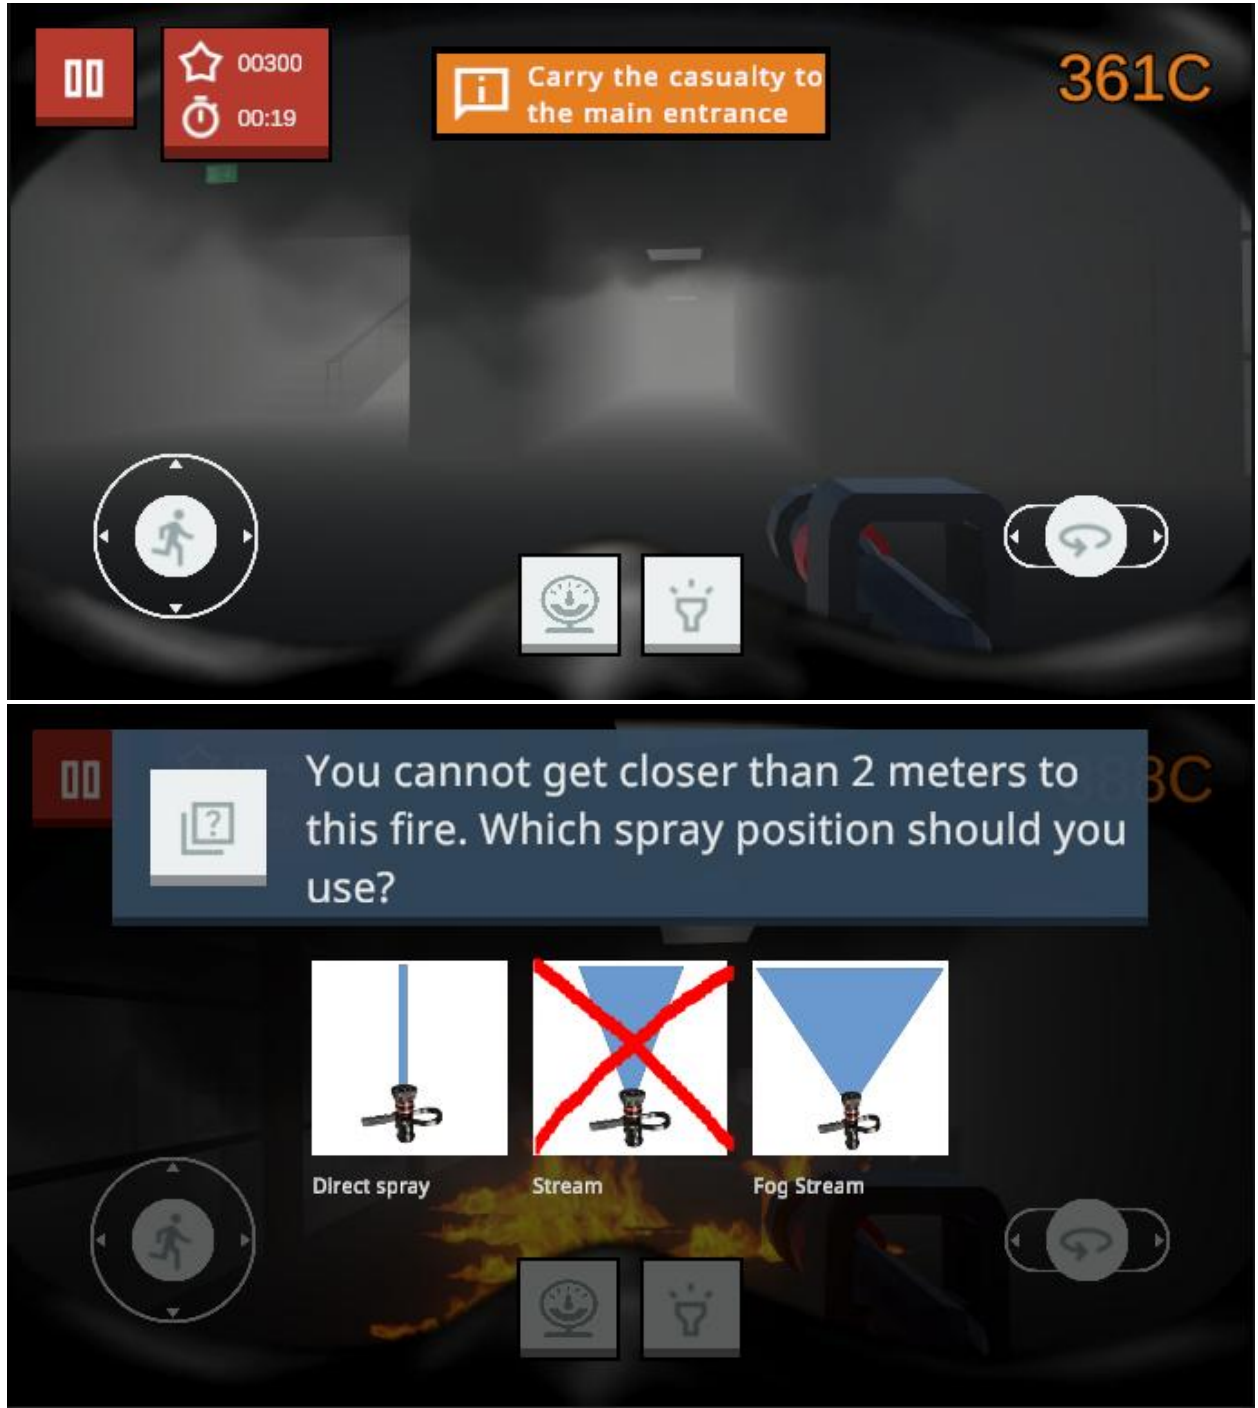

Deponun yerleşimi:

- 10. Ofis bölümüne açılan kapı, ofisin birinci ya da ikinci katına çıkmak için merdivenler kullanılabilir
- 11. Dördüncü yaralının yeri
- 12. Son yangının yeri, doğrudan sprey ile söndürülmelidir

Her bir yaralıyı birinci ofis katında bulunan ana girişe taşımanız gerekecektir (1)

The temperature reaches 625 degrees and you notice that the ceiling catches fire. What do you do?

Direct spray

Stream

Fog Stream

The temperature reaches 500 degrees. What do you do?

Spray the Floor

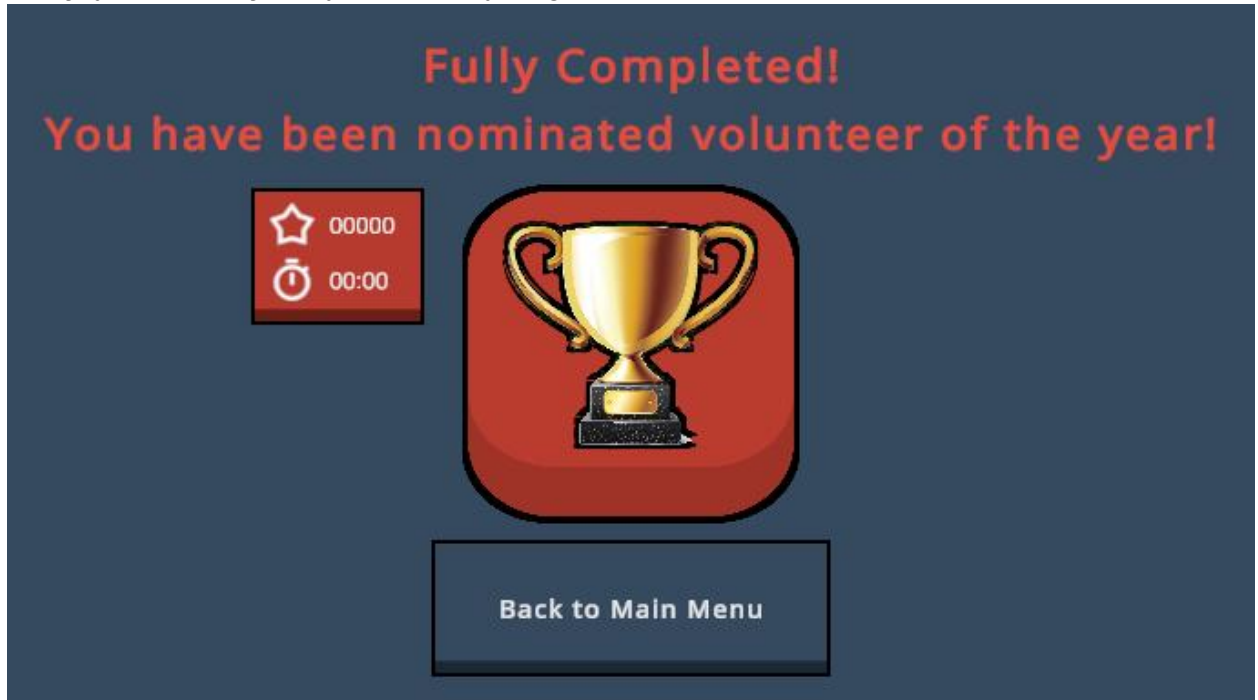

Spray the Ceiling

Her şeyi 5 dakika içinde yaparsanız, yılın gönüllüsü ödülünü alacaksınız

Heyelan Senaryosu: Seviye 1

 Weather Alert! Heavy rainfall and potential landslides predicted for hillside houses. What do you do?

  

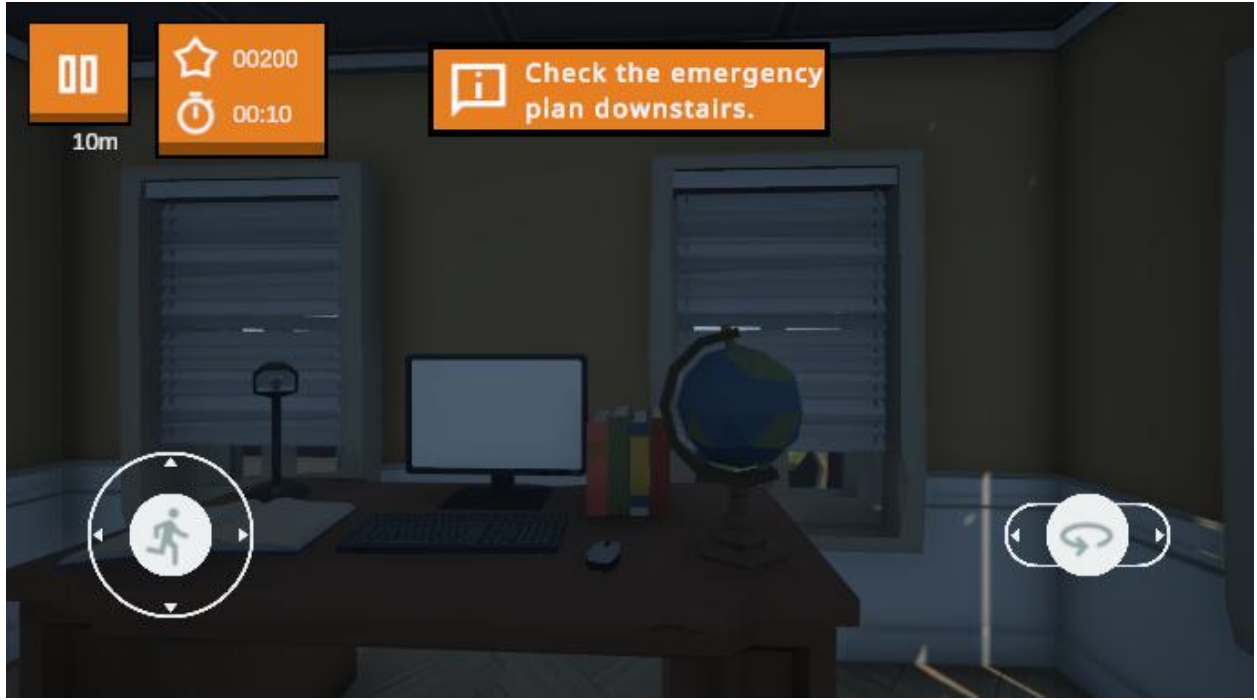

Ignore the forecast and go about your day as usual. Start preparations for possible landslides. Go outside and watch the rain.

 What should be the first step in a possible landslide?

Check the emergency plan. Leave the house in your car.

Yol işareti nereye gitmeniz gerektiğini gösterecektir

What should you do after reviewing the emergency plan?

Gather emergency supplies.

Call a neighbor to chat about the weather.

Take a nap.

Which of the following should you NOT put into your emergency kit?

Flashlight

Radio

Batteries

Bicycle

00

Which of the following should you NOT put into your emergency kit?

Medicines

Toothbrush

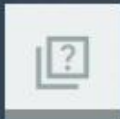

Wet Wipes

Make-up

00

Which of the following should you NOT put into your emergency kit?

Canned Food

Water

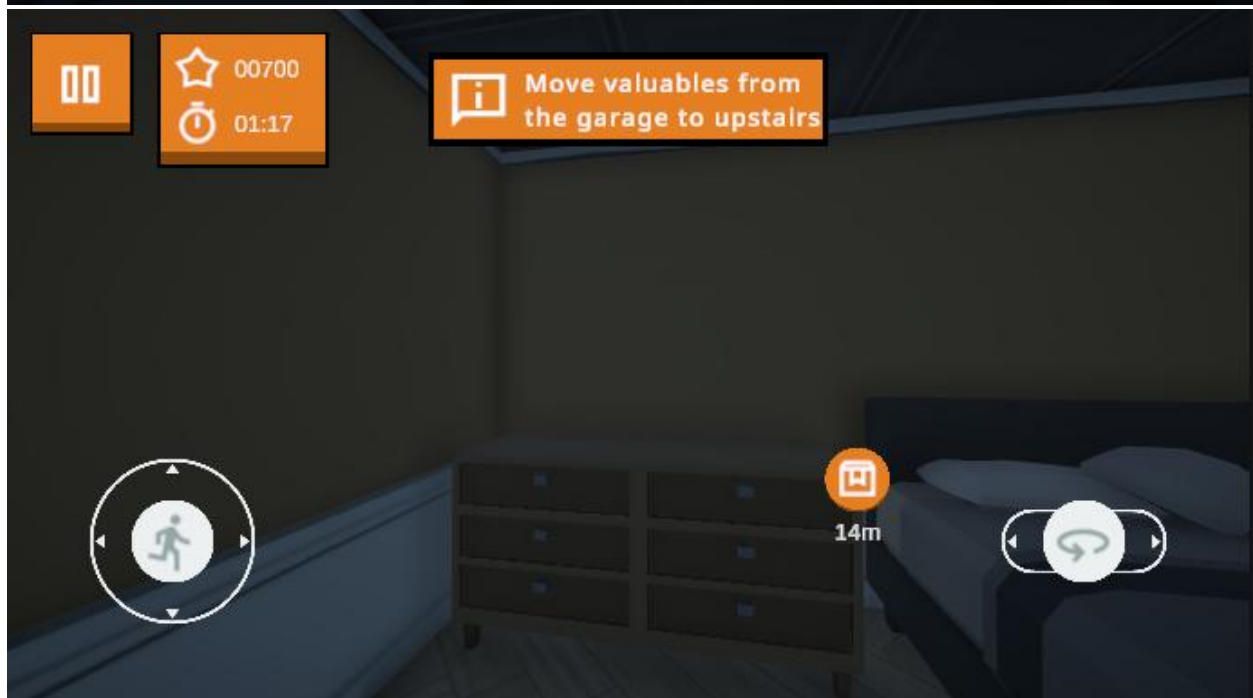

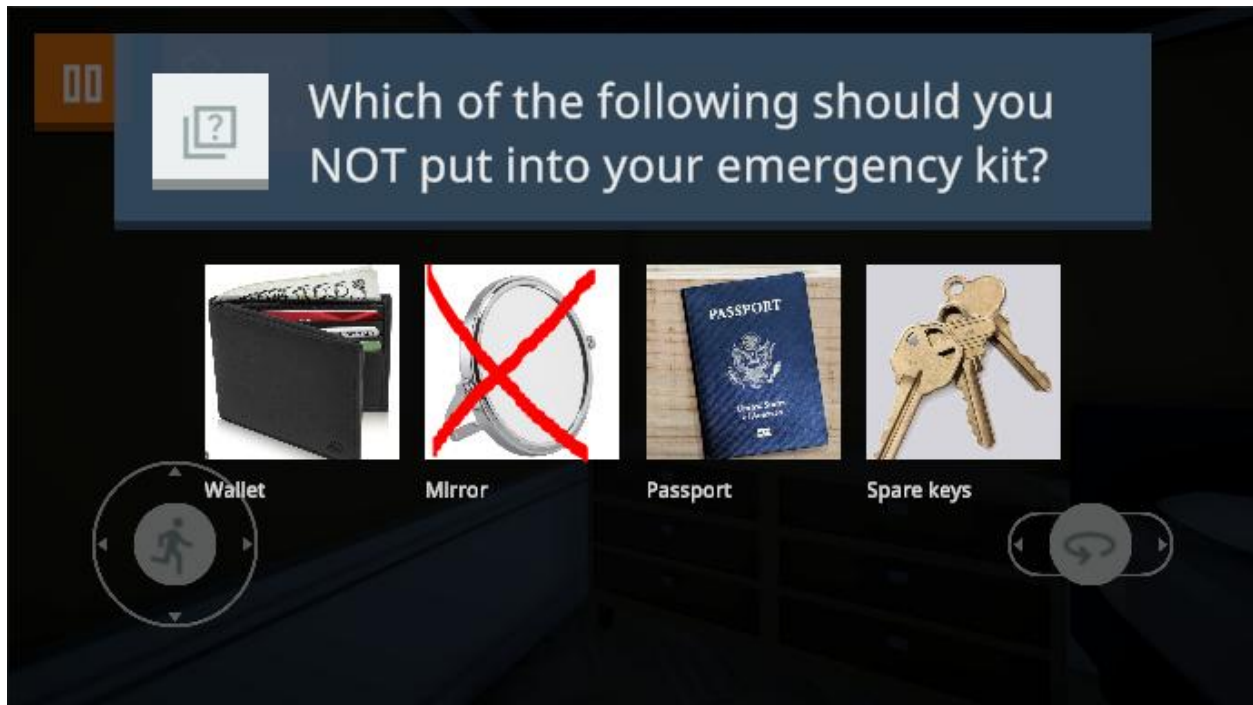

Cake

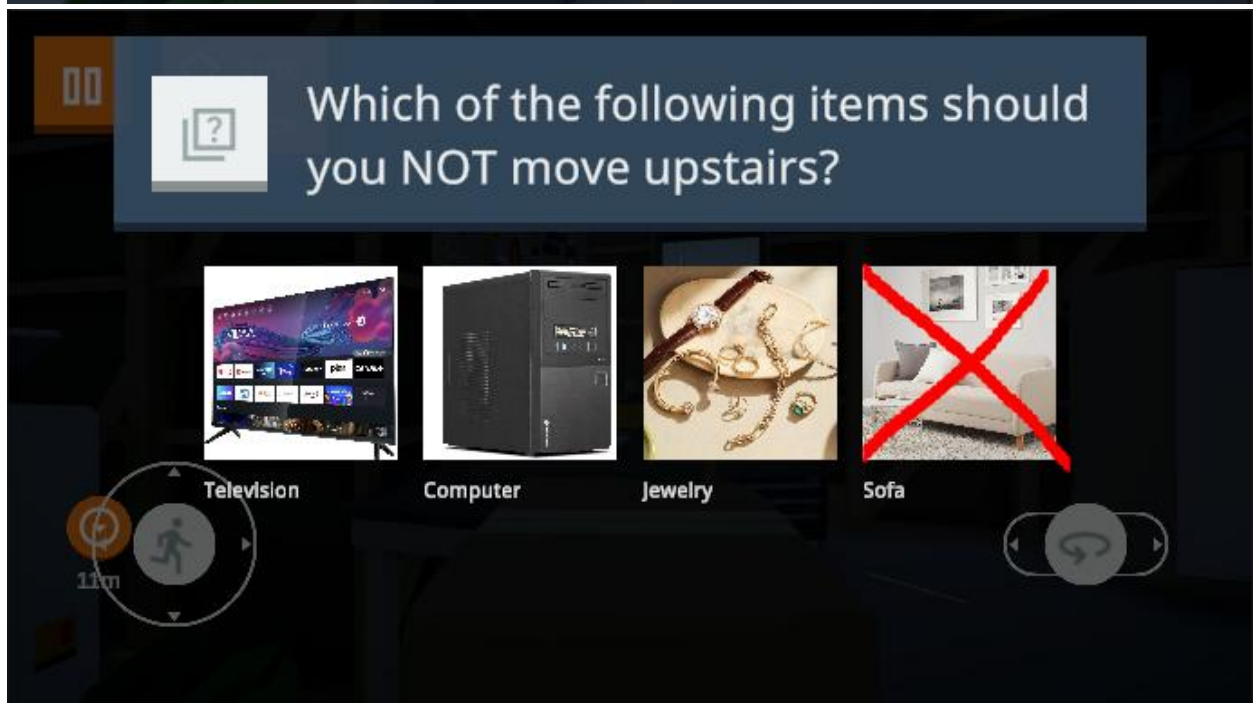

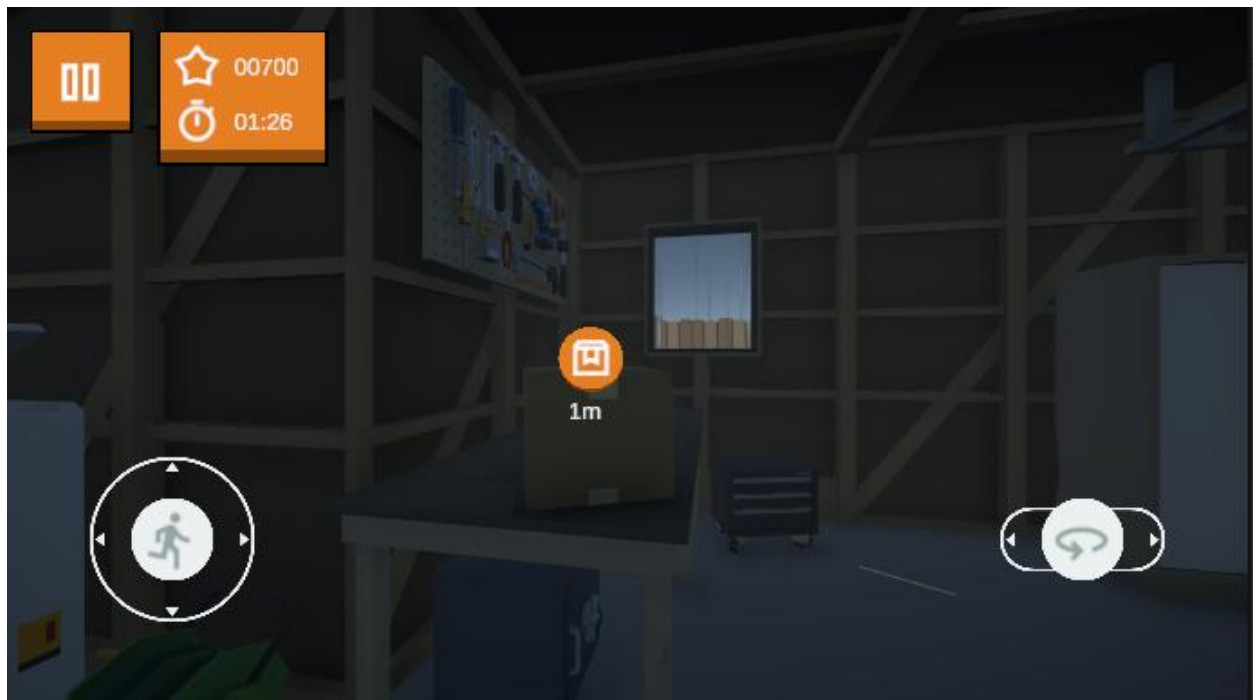

Dried fruit

Garaja gitmeli ve değerli eşyalarınızla dolu kutuyu almalısınız

The intensity of the rain has increased dramatically and you heard loud thunder. What should you do?

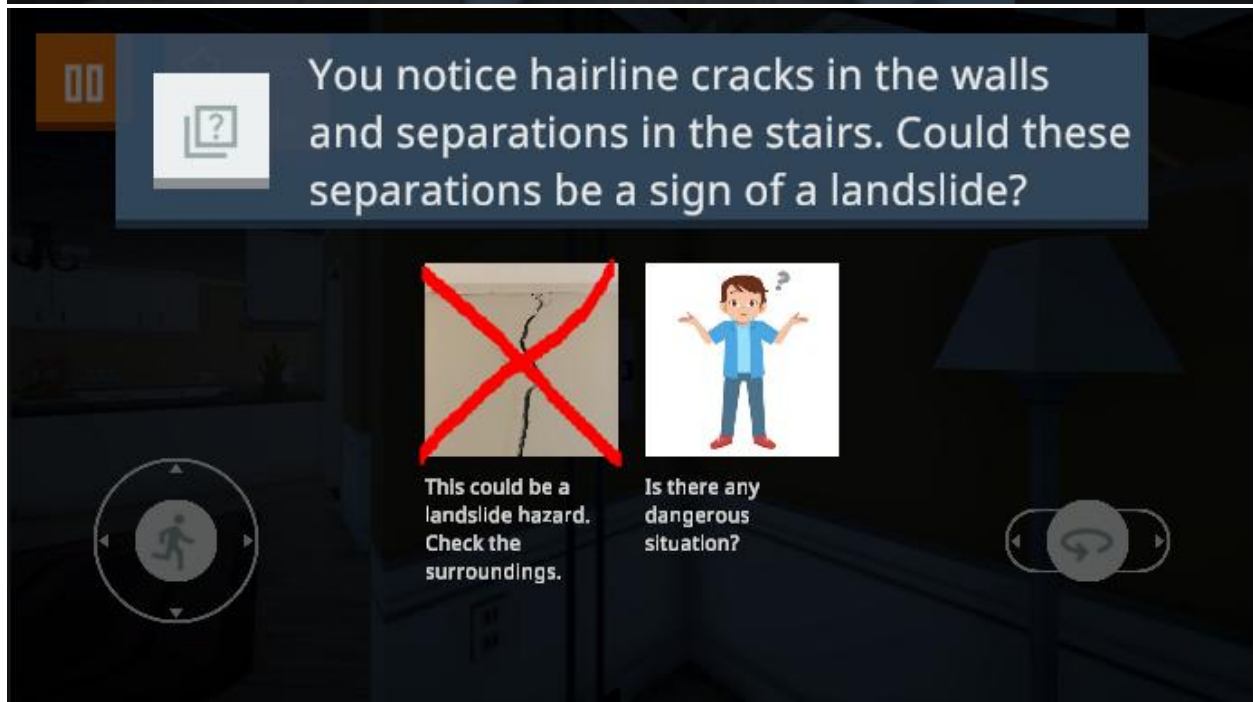

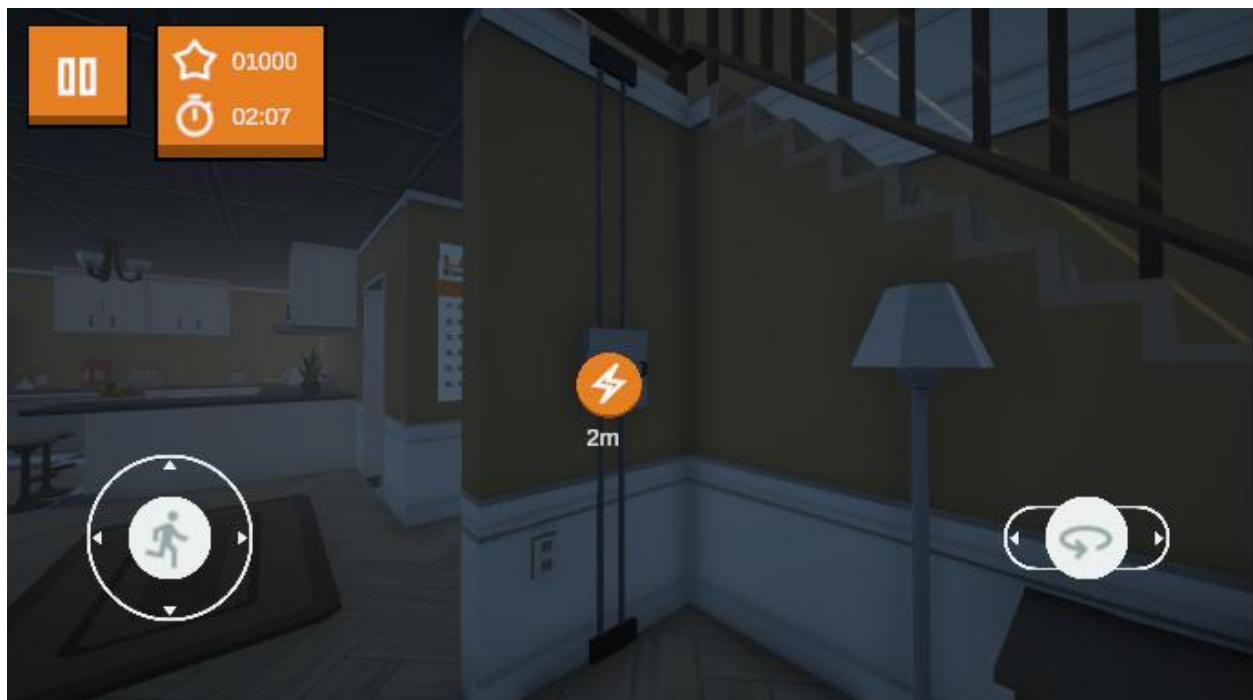

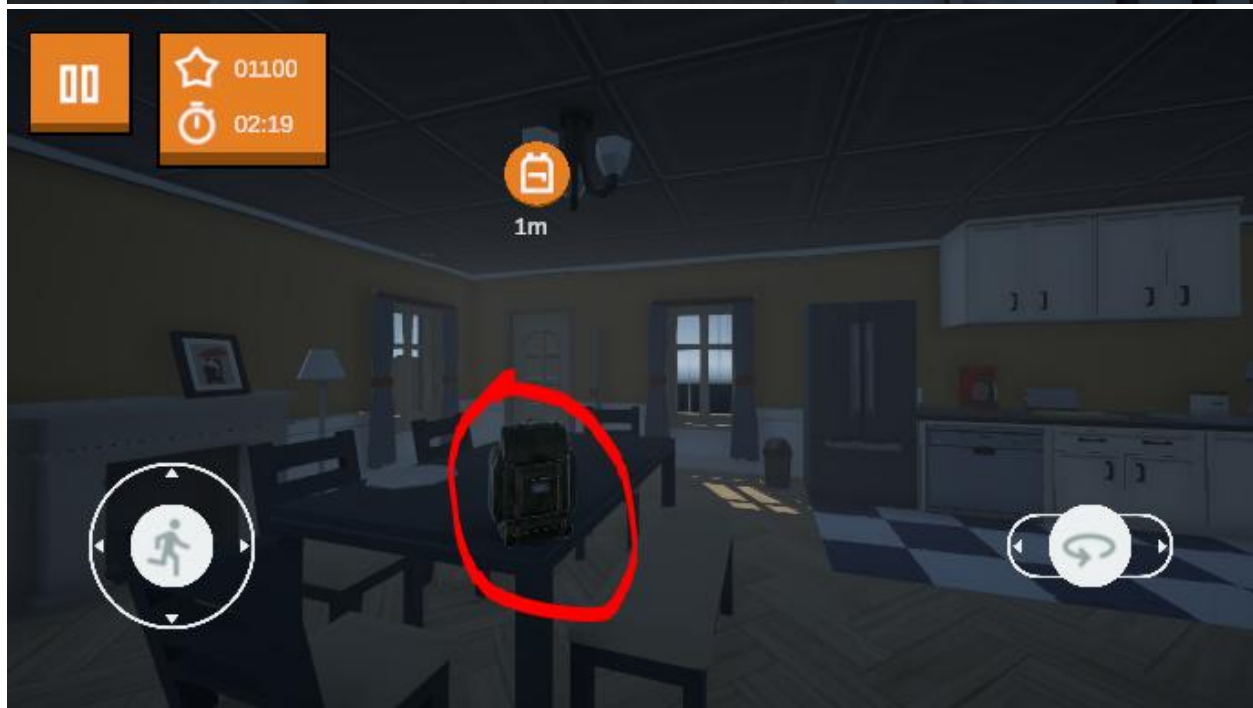

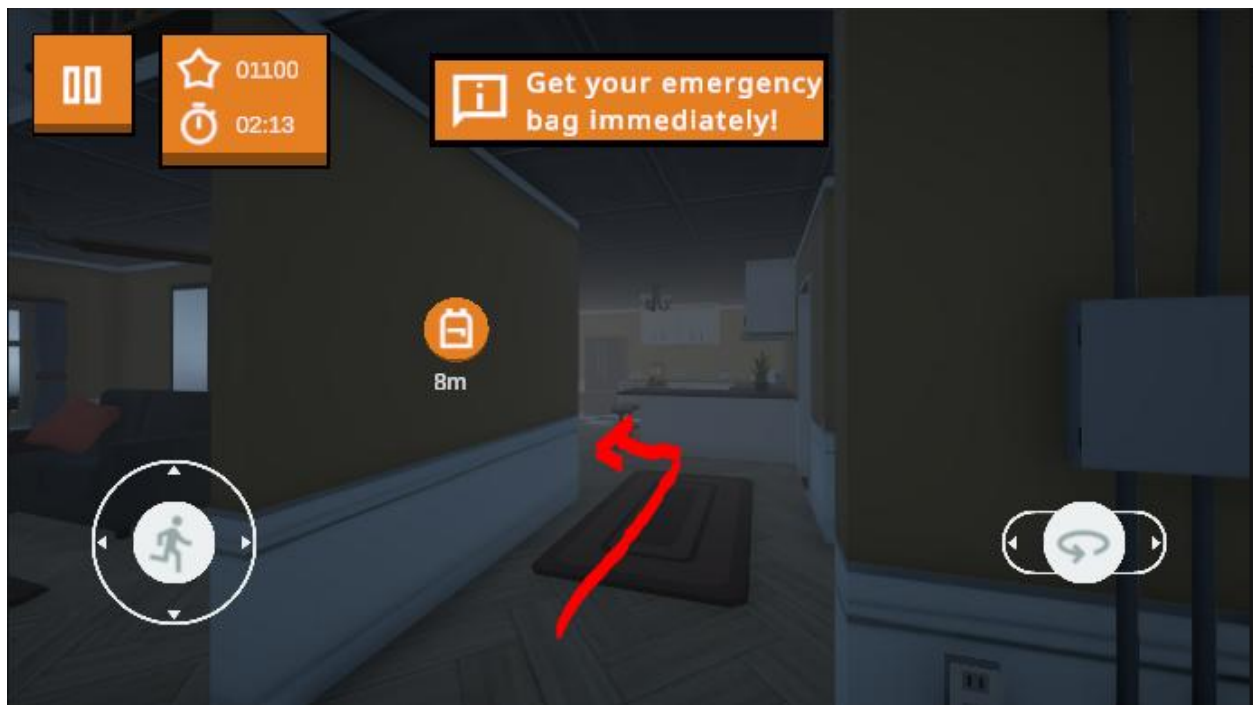

Turn off electricity and gas

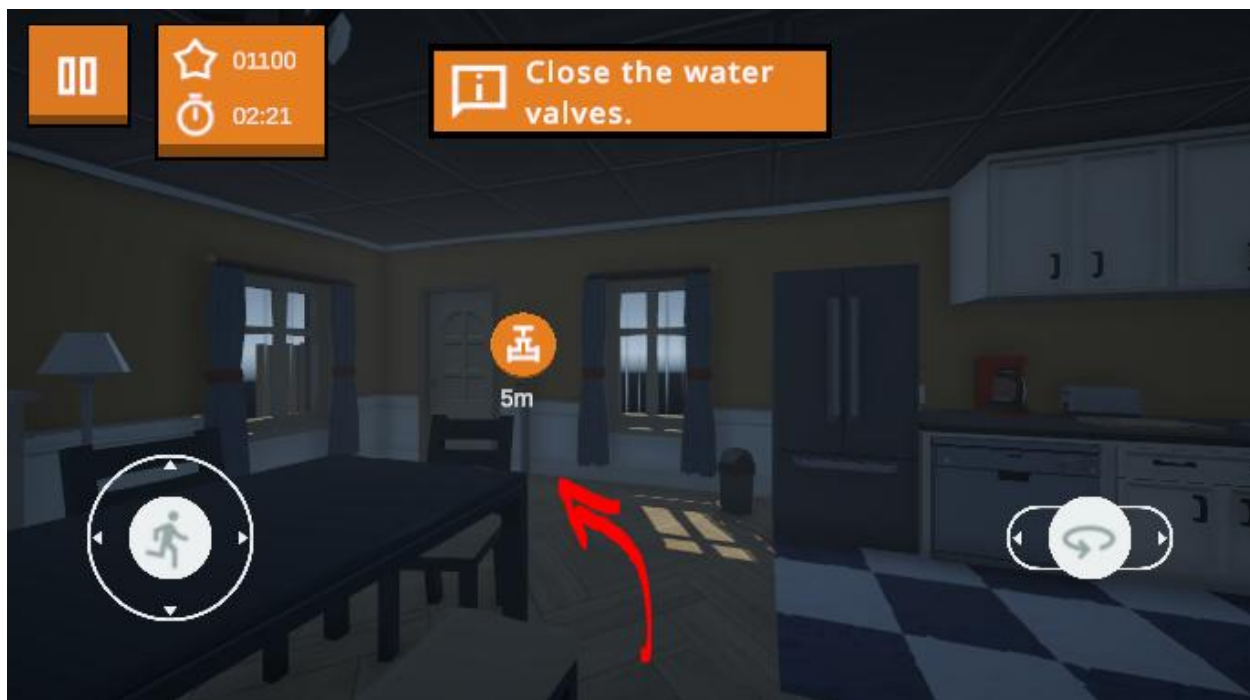

Go downstairs and wait it out.

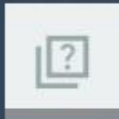

Heyelan Senaryosu: Seviye 2

Which path should you take to get to the assembly area according to this topographical risk map?

Path 1

Path 2

You have tasks to complete on your way to the meeting area!

22m

12m

32m

24m

Acil durum toplanma alanına gitmelerine yardımcı olmak için haritadaki her bir kişiye yaklaşın

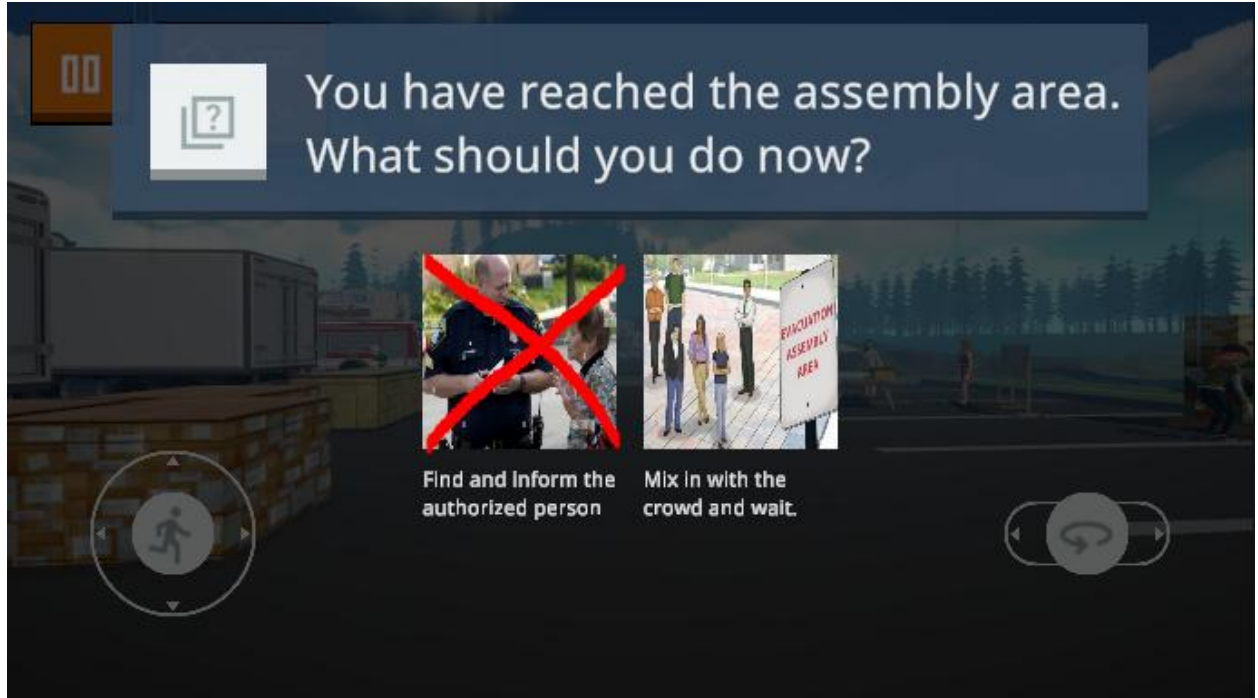

Her bir kişiye yaklaştıktan sonra acil durum toplantı alanının bulunduğu yöne doğru gidin

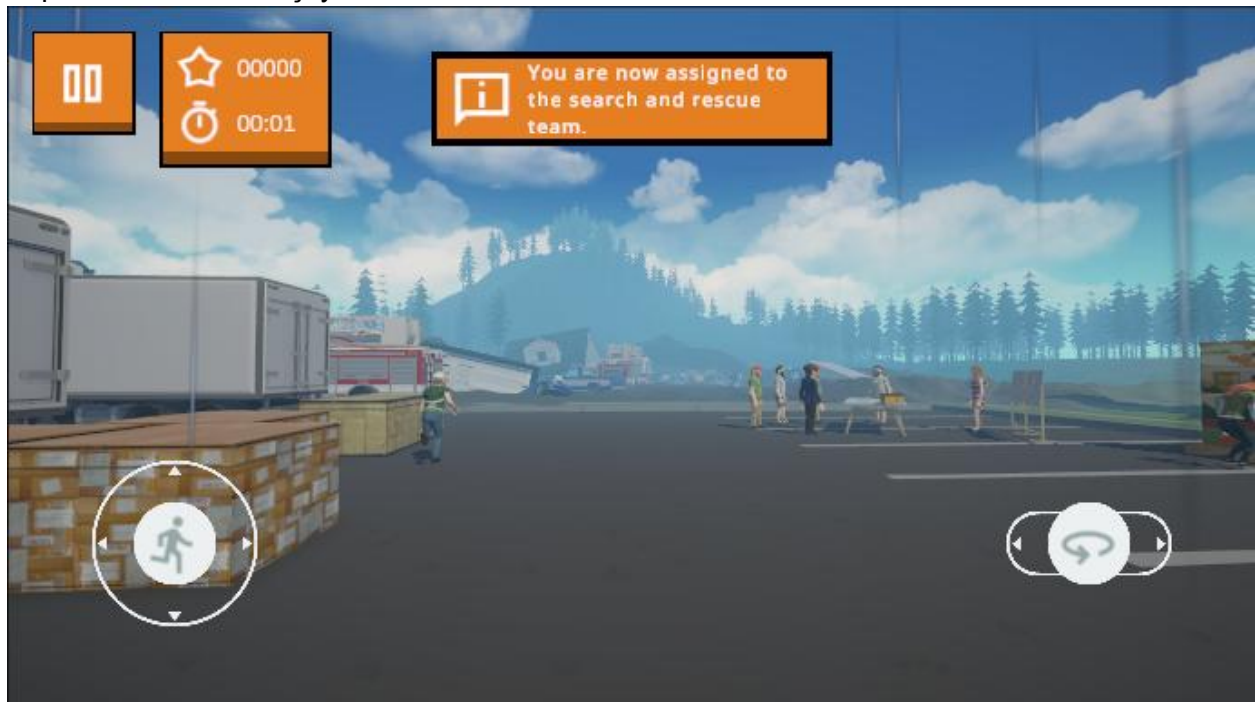

Eğer güvenli yolu seçtiyseniz, toplantı alanına varacaksınız

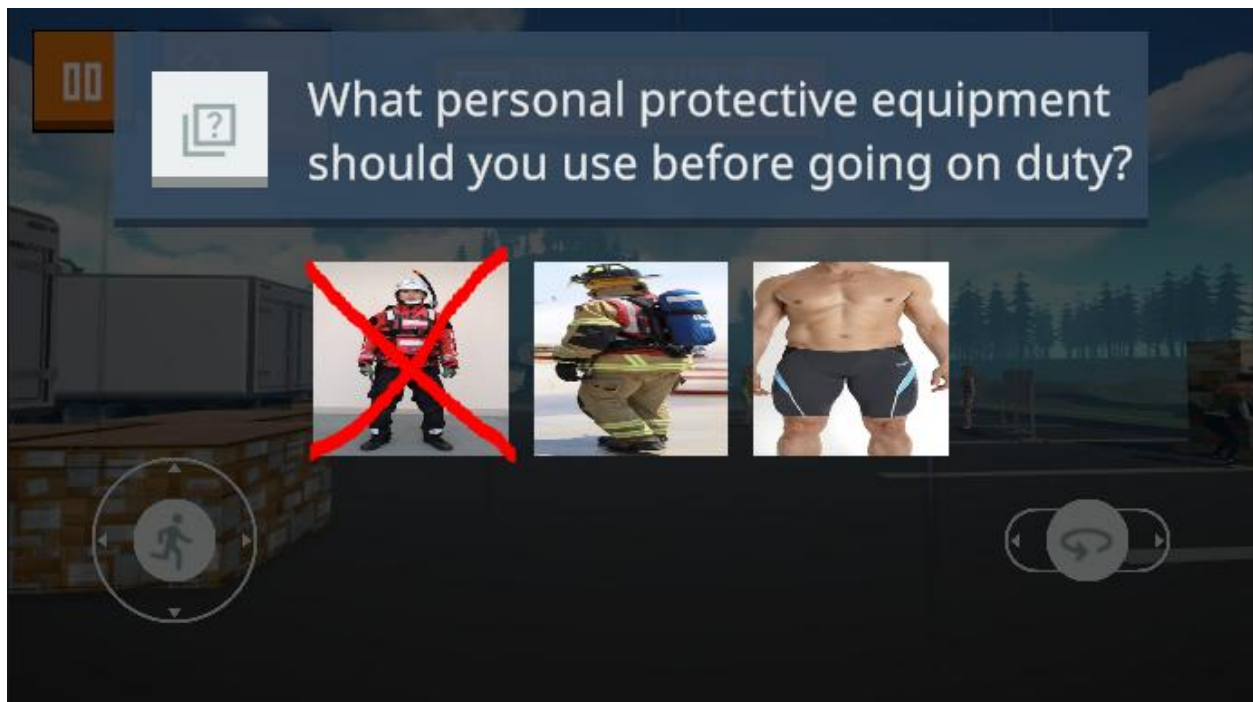

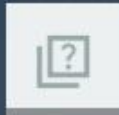

Heyelan Senaryosu: Seviye 3

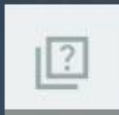

Toplantı alanından başlıyorsunuz. Arama ve kurtarma ekibine atandınız

Which is a safe area for the rescue team against new landslide hazards?

Which is one of the techniques used in search and rescue efforts after landslides?

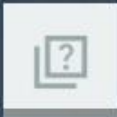

Search dogs

A lifeguard.

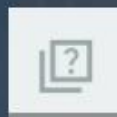

The victim has stopped breathing.
What should you do?

Give artificial
respiration

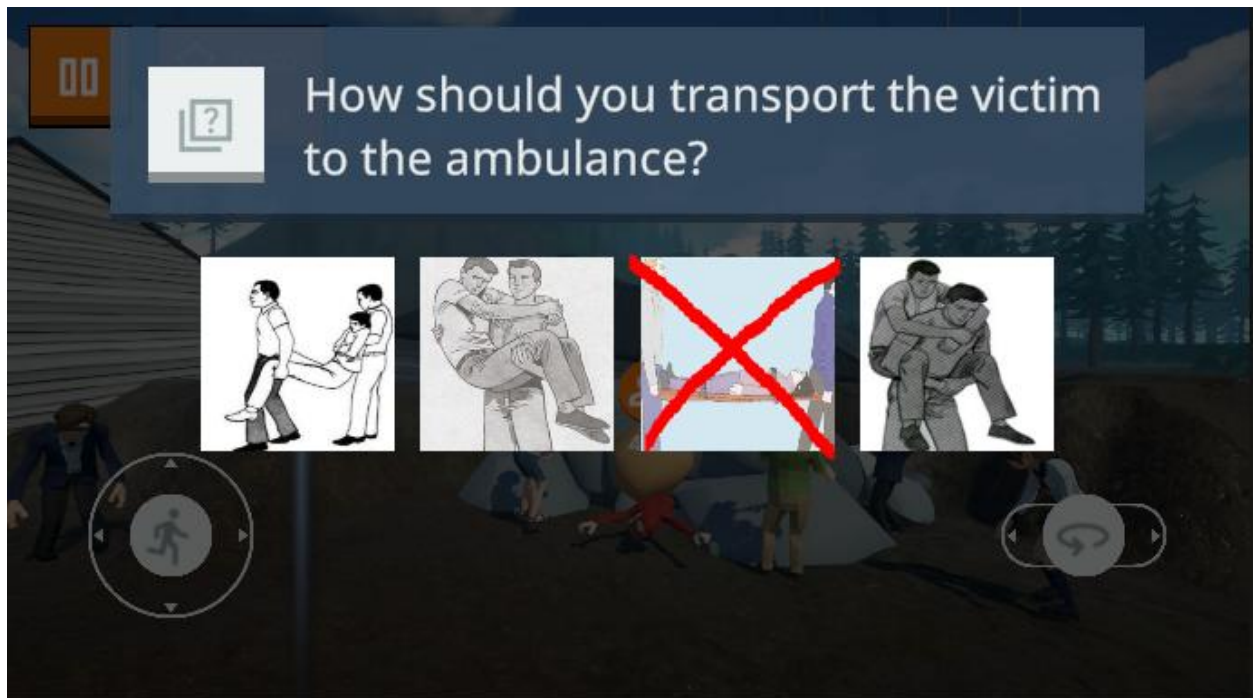

Emptying the
swallowed water

In which position should and
unconscious victim with respiratory
arrest be transferred?

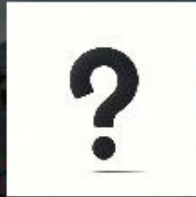

What is the first step in assessing landslide risk?

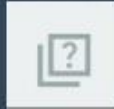

Survey the terrain for slopes and water channels.

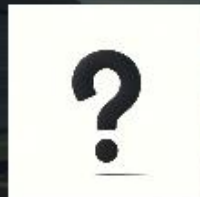

Wait for an official report.

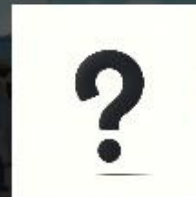

Ignore and proceed with daily activities.

Where should retaining walls or other structural methods be installed to prevent landslides?

In flat areas.

Near water bodies

At the base of unstable slopes

How can drainage systems help mitigate landslides?

?

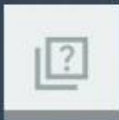

By increasing water flow into slopes.

~~?~~

~~By redirecting water flow away from slopes.~~

?

By blocking water flow completely.

Why is planting vegetation important for landslide mitigation?

?

It provides shade.

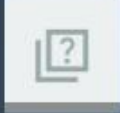

~~?~~

~~It strengthens soil structure and prevents erosion.~~

?

It attracts wildlife.

What topics should be covered in community workshops on landslide prevention?

?

Identification of landslide risks.

?

Steps to take during heavy rainfall.

~~?~~

Both A and B.

Fully Completed!

Congratulations! You have successfully implemented landslide mitigation measures and educated your community.

Which of the following items should you NOT move upstairs?

Television

Computer

Jewelry

Sofa

What precautions should be taken in case of a possible water level rise?

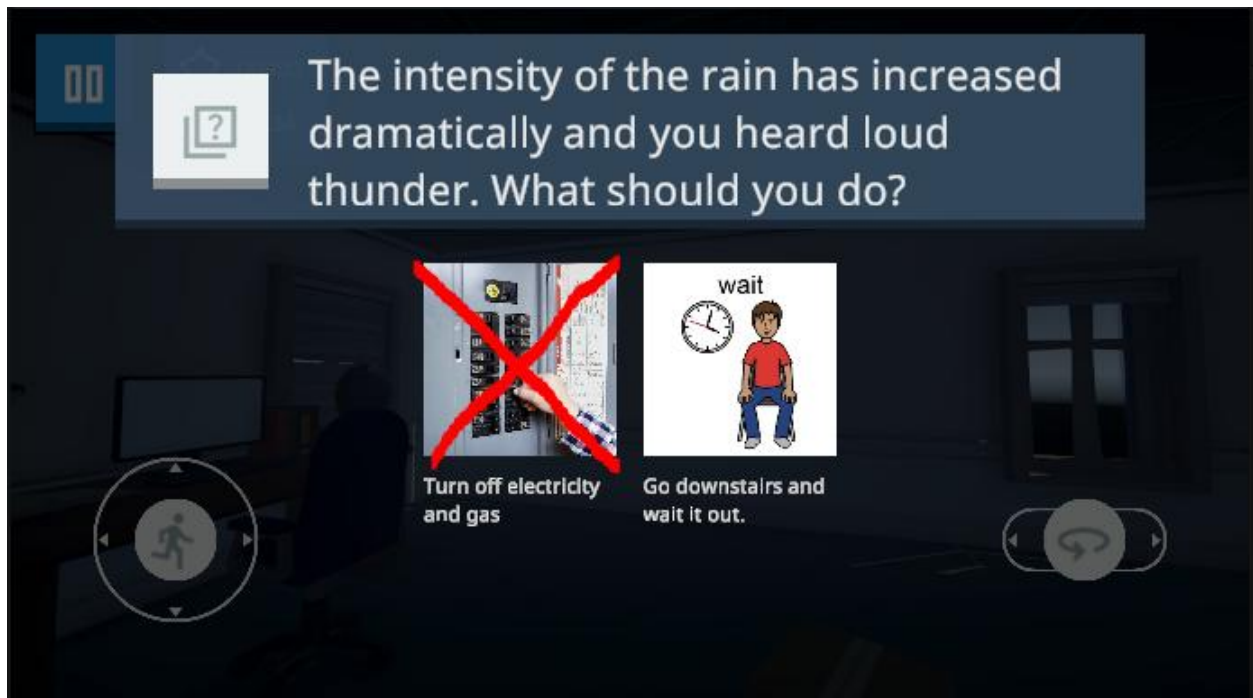

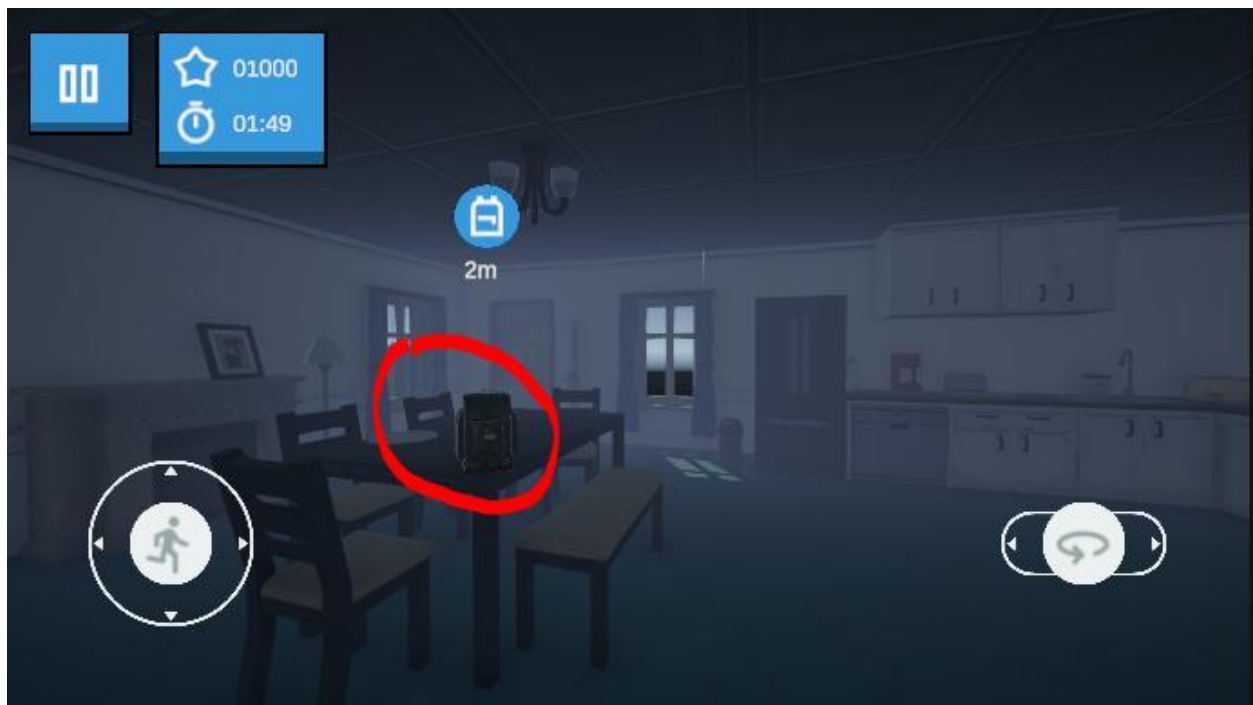

Put sand in a sandbag and place it on the doorstep

Barricade the door with furniture.

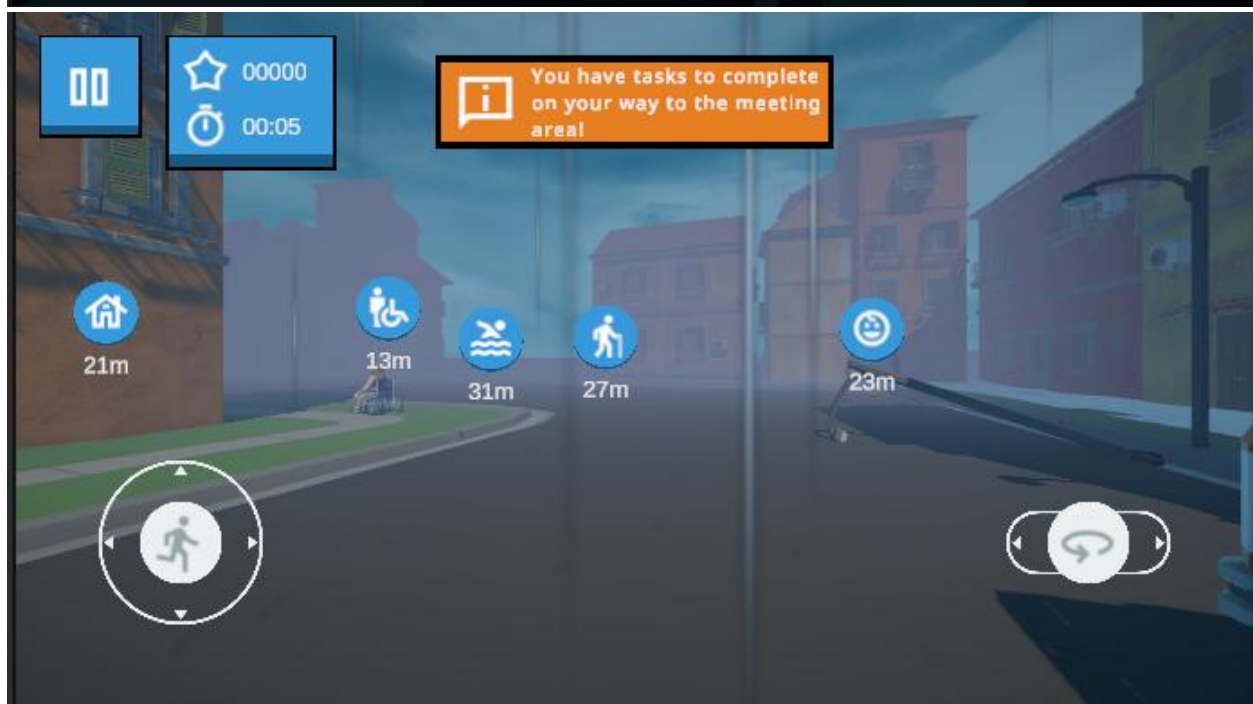

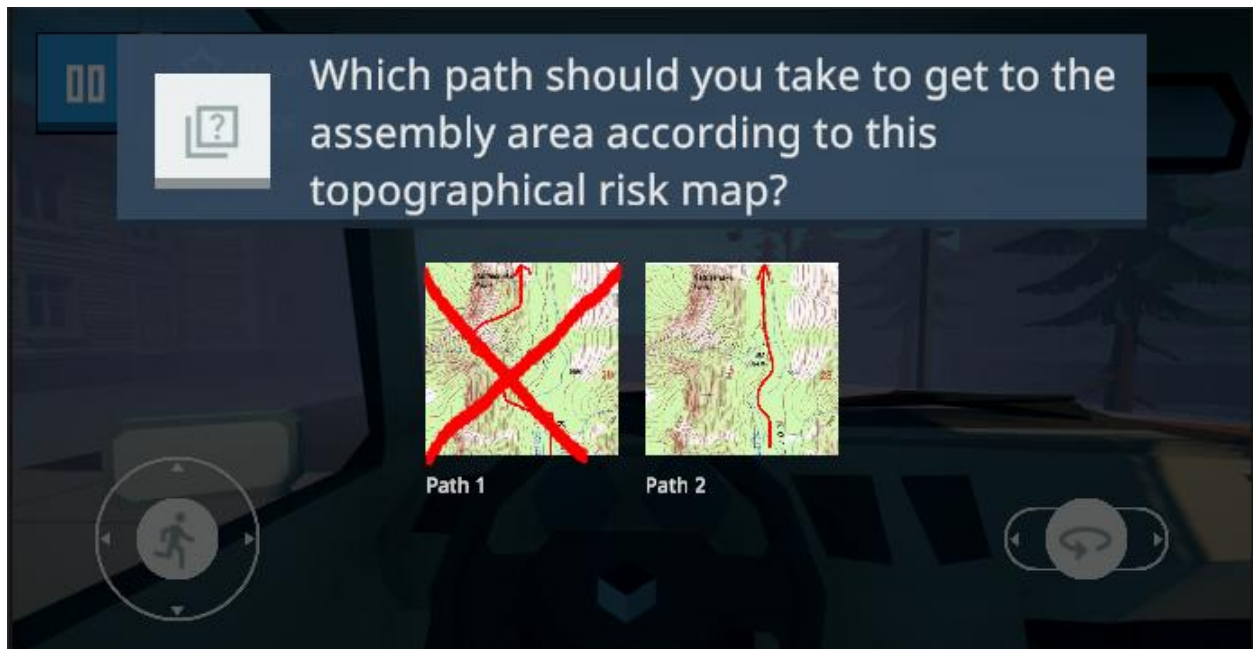

Taşkın Senaryosu: Seviye 2

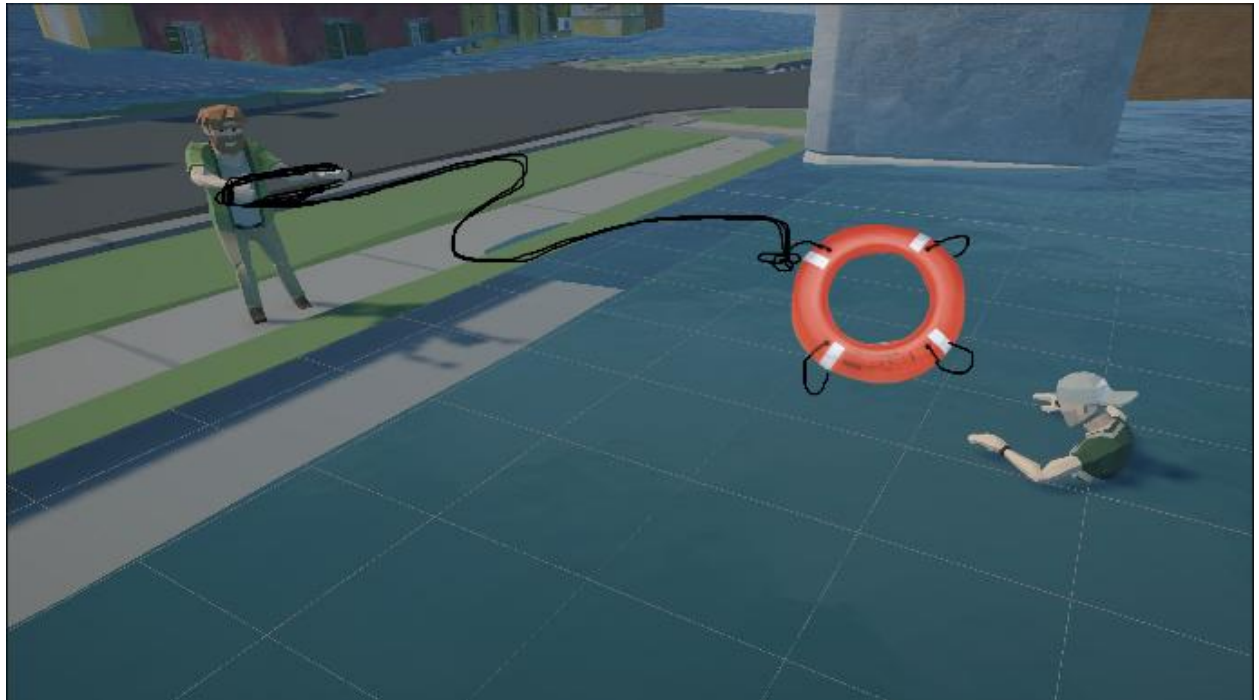

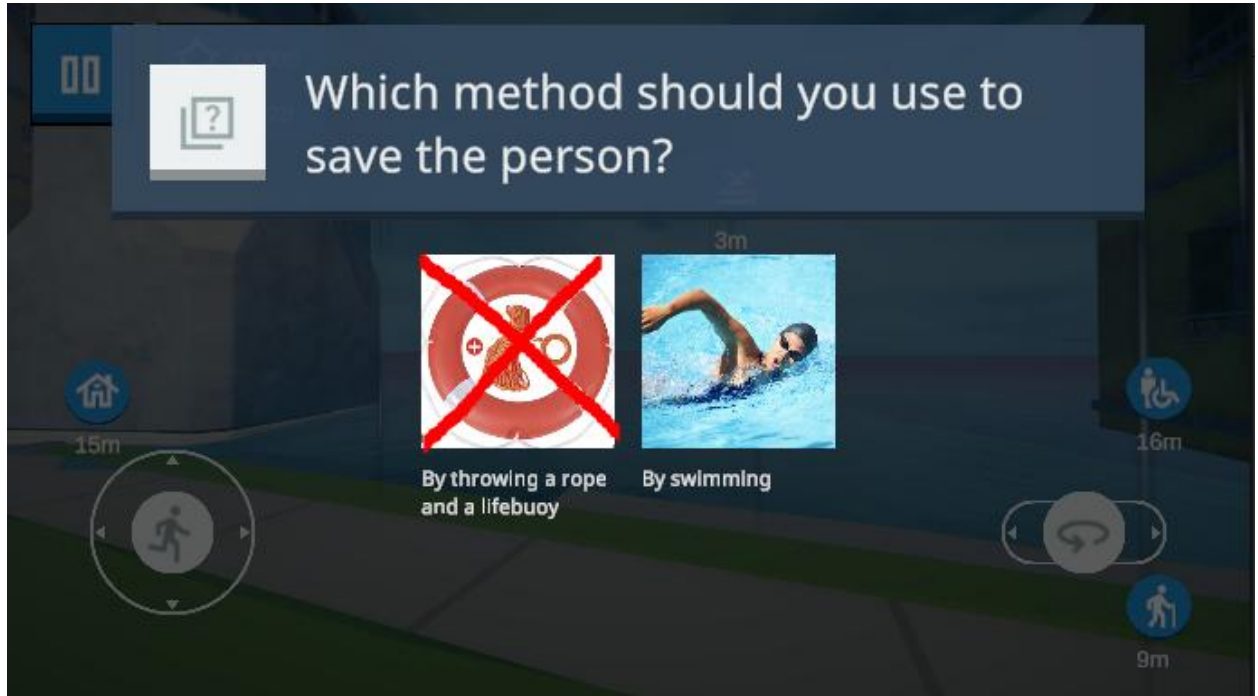

Acil durum alanına yönlendirmek için her bir kişiye yaklaşın

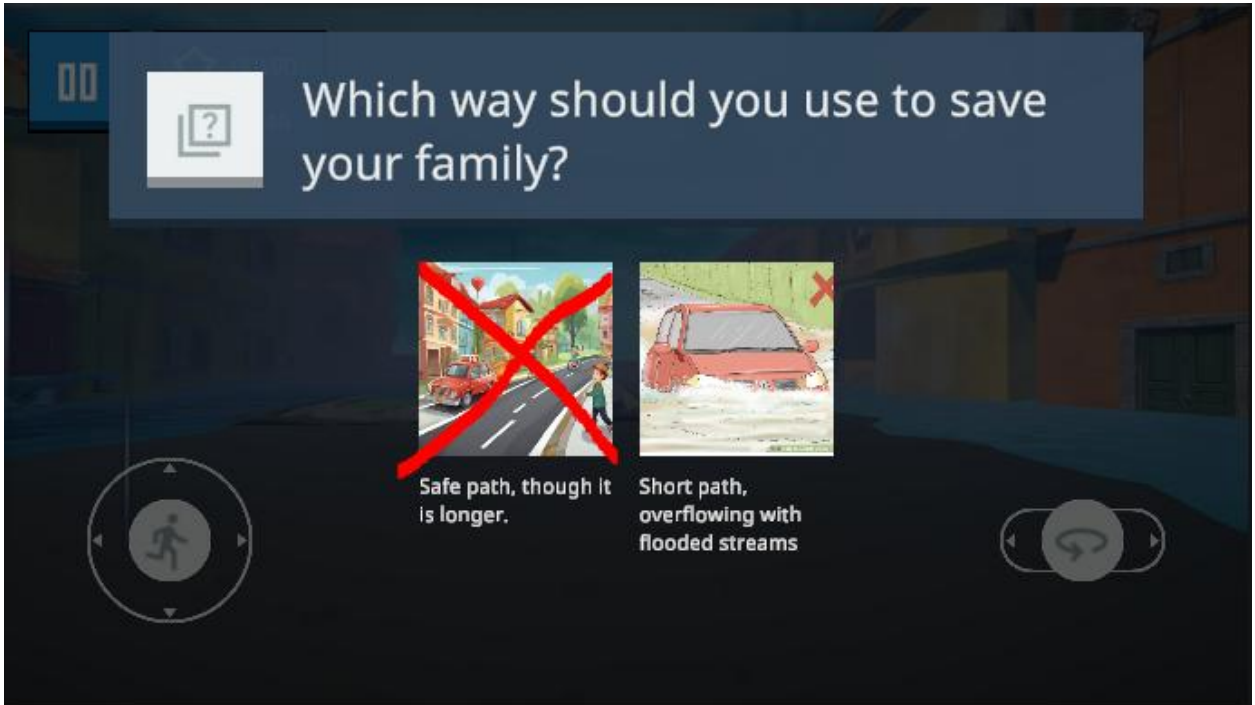

Suda boğulmakta olan bir kişi var. Can simidi kullanarak ona yardım etmelisiniz.

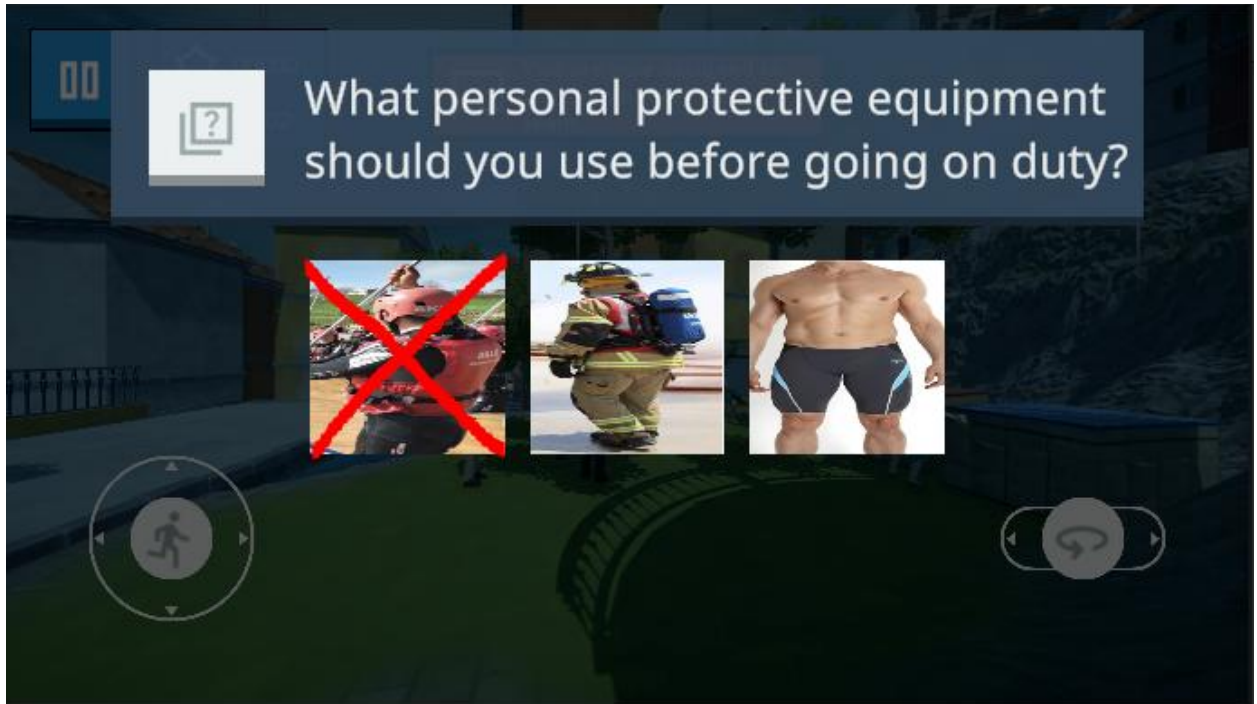

Tehlikeli bölgedeki insanları yönlendirmeyi bitirdiğinizde acil durum alanına doğru devam edin.

Kendi güvenliğinizi garanti altına almak için güvenli yolu kullanın

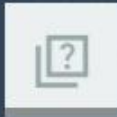

Taşkın Senaryosu: Seviye 3

Toplanma alanına vardıktan sonra bir arama ve kurtarma ekibine atandınız. Bir yaralının kurtarılmasına yardım etmeniz gerekiyor.

What should you give to the person to be rescued?

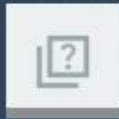

Life Jacket and helmet

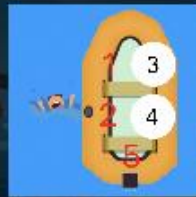

Fins and snorkel

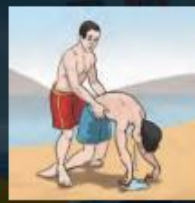

Select rescue members from the top of the boat

The victim has stopped breathing, what should you do?

Give artificial respiration

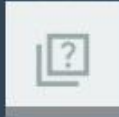

Emptying the swallowed water

In which position should and unconscious victim with respiratory arrest be transferred?

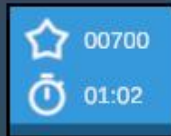

How should you transport the victim to the ambulance?

You see a dog trapped in water on water's edge. As a professional swimmer, which method should you use to rescue the dog?

Fully Completed!
You have been nominated volunteer of the year!
