READY4DIsaster training modules (Result 2)

The second project result is the creation and implementation of training modules for civil protection volunteers.
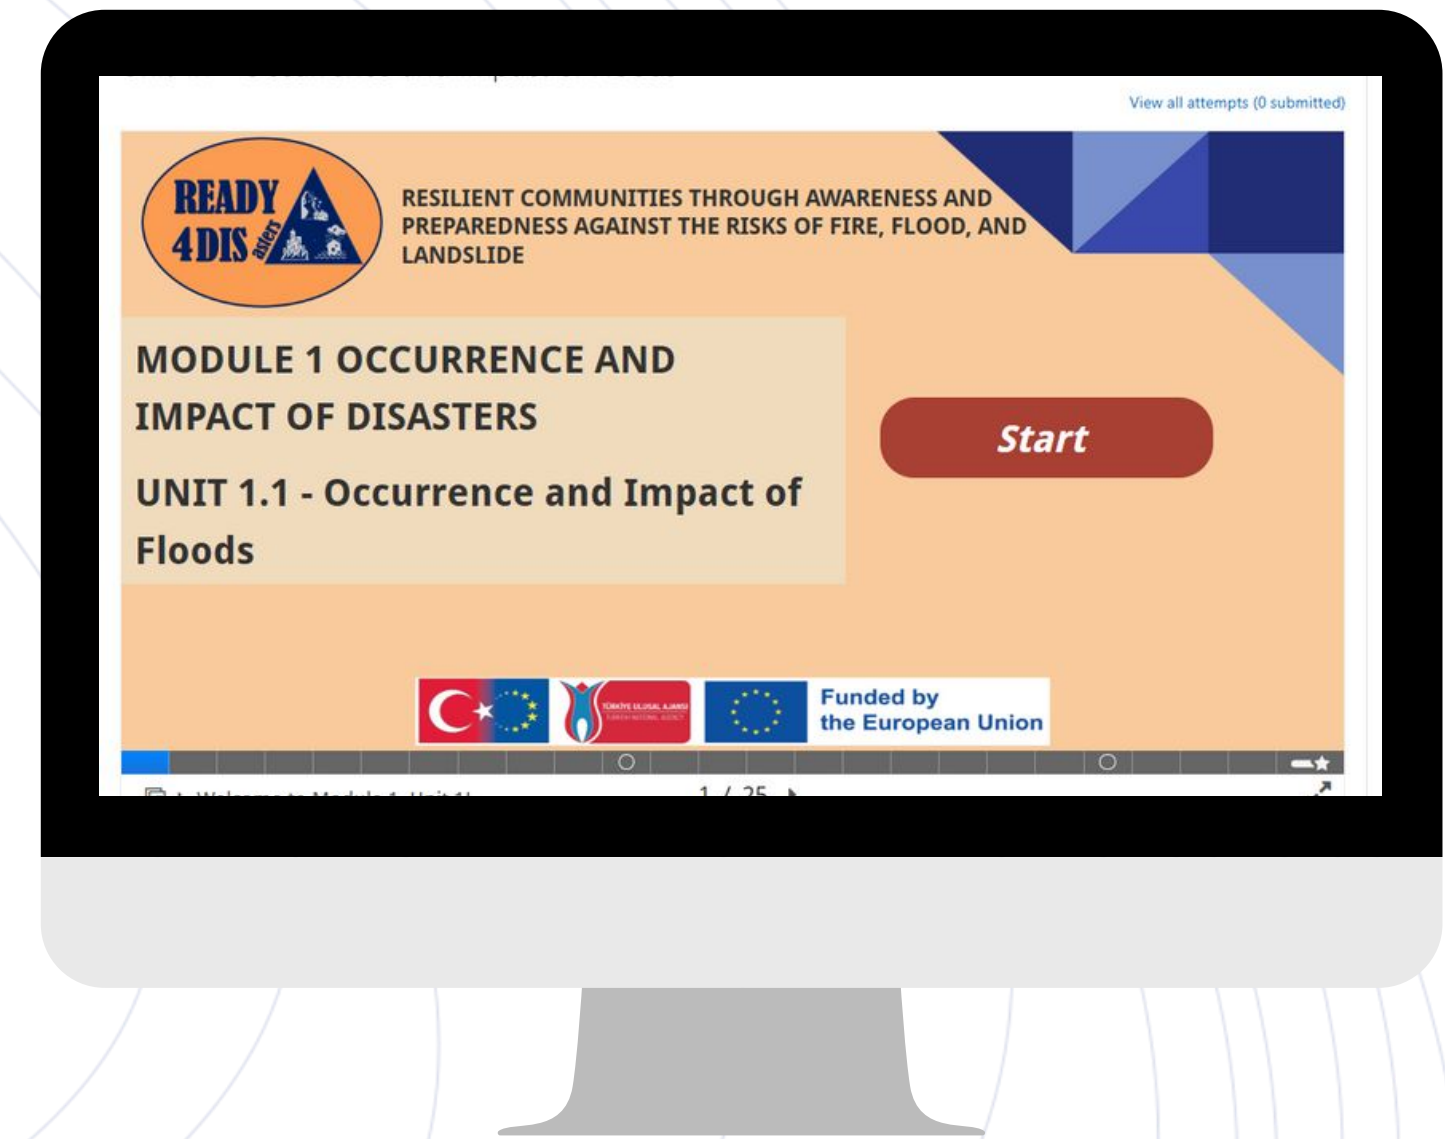

- The modules are developed under the form of **Open Education Resources (OER).**

- These modules are hosted on a dedicated **e-learning platform** and can be **accessed via the project website.**

- The modules are available in **English, Turkish, Italian, Greek and Georgian** on the project website.

The READY4DIsaster training modules and OER

The READY4Disaster **8 training modules are divided into several learning units.**

1. **Occurrences and impact of disasters**

2. **Flood disasters**

3. **Landslide disasters**

4. **Fire-related disasters**

5. **Rescue and rescue equipment (for floods, fires, landslides)**

6. **Promoting prevention over recovery**

7. **Resiliency metrics/indicator**

8. **The EU civil protection mechanism**

READY4Disaster training modules structure

The READY4DISASTER training modules and OERs offers an interactive and engaging learning experience.

Each of the 8 modules and related units includes:

1. **Interactive presentations** with quizzes, images, videos and external links.

2. **Self-assessment test** to reinforce learning and acknowledge acquired learning.

3. In-depth **document** (Chapters) that offers a **detailed exploration of the module's topics,** allowing learners to delve deeper into the subject matter.
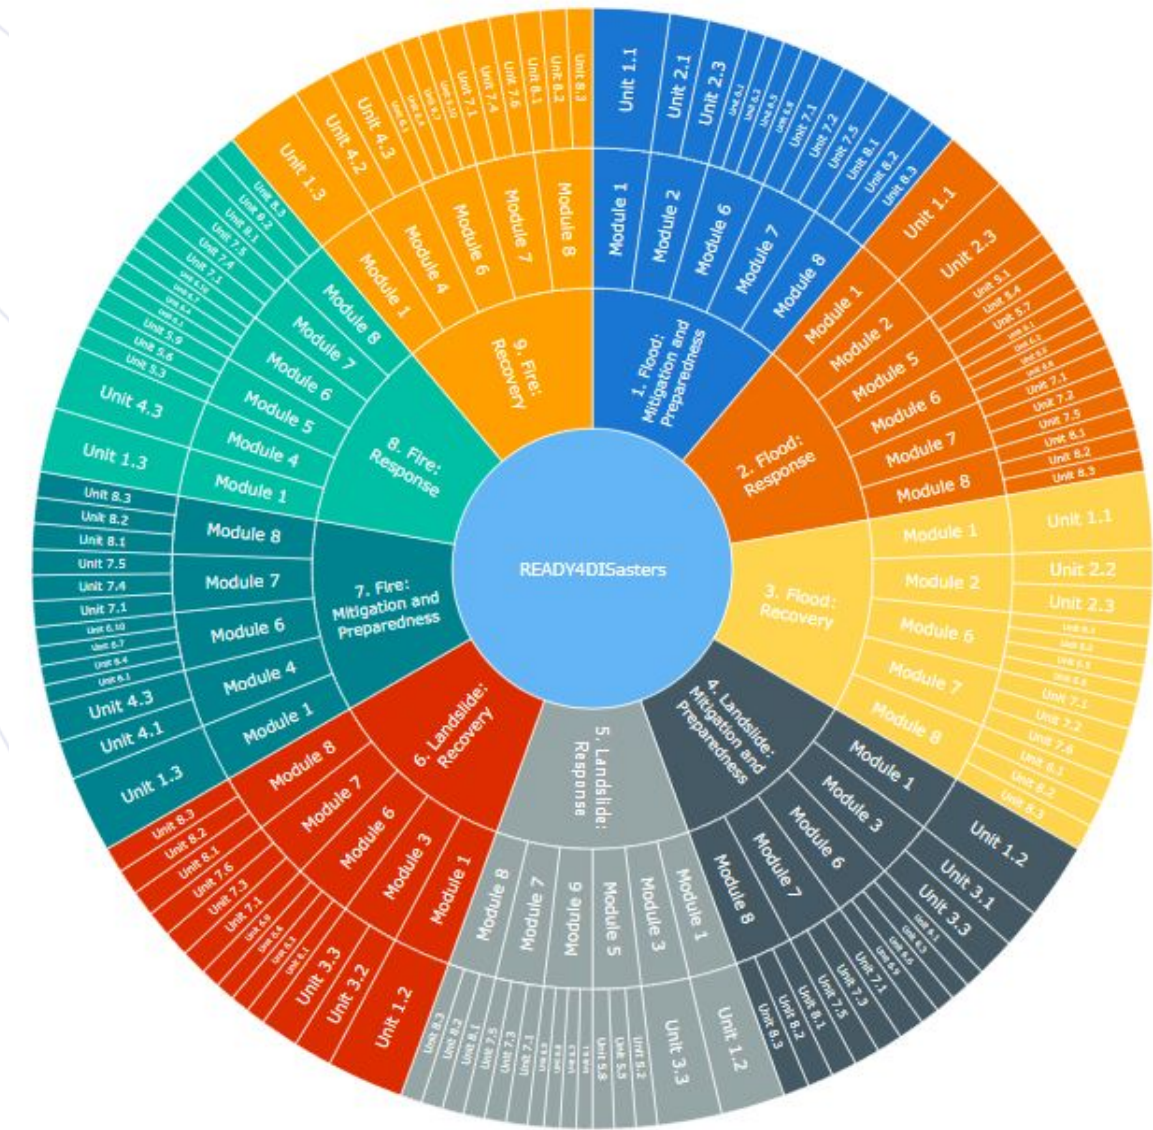

How to access the training modules?

Learners can access the OERs via the project website, no registration

is required.

1. Via an **interactive wheel**: For each of the 3 natural disasters

    (Flood, landslide, and fire) learners can choose to start their

    learning path in:

    *   mitigation and preparedness

    *   response

    *   recovery

2. Via a simple table with links.

How to access the training modules?

- To learn more about each chapter, learners can also download the **Modules Chapters**

- **They are divided in units**

- Learners can access the chapters via the project website

Training Modules

The educational content consists of the following modules (chapters):

	Title	Number of units
Module 1	Occurrences and impact of disasters	3
Module 2	Flood disasters	3
Module 3	Landslide disasters	3
Module 4	Fire-related disasters	3
Module 5	Rescue/rescue equipment	9
Module 6	Promoting prevention over recovery	10
Module 7	Resiliency metrics/indicators	6
Module 8	European mechanism in civil protection	3

Funded by the European Union

READY4Disaster: Selected Case studies

The OER offers valuable insights from real-world disasters, such as:

- Floods in the Emilia-Romagna region (Italy) in May 2023

- Wildfires in the Attica Region (Greece) in July 2023

- Landslides in Kocaeli (Turkey) in April 2023 and many more...

These case studies, curated by READY4Disaster partners, provide opportunities to **learn from past events and enhance disaster preparedness.**
